**Duncan Foley (The New School for Social Research)**

**Current Research**
- Generic model of social interaction, externalities and bifurcating equilibria.
- The Edgeworth-Pareto ensemble and endogenous inequality of wealth and income from market transactions.
- Models of behavior with bounded entropy ("rational inattention").
- Statistical equilibrium and information in games, with David Wolpert.

**Forthcoming Publications**
- Paper on "Varieties of Keynesianism" forthcoming in International Journal of Political Economy

**Other Updates**
- Revision of intermediate microeconomics textbook with Sam Bowles
- Working on new edition of Growth and Distribution with Tom Michl and Daniele Tavani
