A note from Prof. Marianne Noble: I have selected about a third of the 1779 poems included in The Poems of Emily Dickinson, Reading Edition. These are what strike me as “the canon”—that is to say, the poems that are most frequently taught and discussed. I have also included some personal favorites, as well as some that give a sense of the diversity of Dickinson’s thinking and writing. However, don’t let this list limit you! Part of the amazingness of Dickinson’s writing is discovering a poem on your own, with great surprise, in the way it speaks to you. There is no earthly reason not to read the entire book, all on your own—say, ten poems a day for the next six months! Just make sure to get to the following, at least. And enjoy!

I would be happy to recommend 5 or so essays to ground your reading a wee bit.
