R= "Related", F = "Focused" as self reported by AU Faculty through a survey

## UNDERGRADUATE

Dept.	#	COURSE TITLE	DEPARTMENT	R	F	Description
AMST	340	Activism and Social Media	American Studies	1		The course examines the interplay between activism and social media, covering issues such as the environment.
AMST	330	Hunger Games	American Studies	1		This course explores the interplay of class, politics, ethics, and marketing. Some of the topics it covers is the global food crisis, food deserts, and sustainability.
AMST	240	Poverty & Culture	American Studies	1		This course explores the opposing theories regarding the causes and consequences of poverty, discussing how an individual's environment plays a role on his/her socioeconomic status.
ANTH	150	Anthropology of Life in U.S.	Anthropology	1		This course examines how race, gender, class, ethnicity, age, and region/environment affect Americans' experiences of historical, economic, political, scientific, religious, and cultural processes. The environment is explored in the context of Americans' experiences.
ANTH	450	Anthropology of Power	Anthropology	1		This capstone seminar is the culmination of undergraduate studies in anthropology, including ethnography. Students practice research design, data collection, and quantitative and qualitative analysis. This course relates to the environment in regards to the focus of sustainability within the realm of anthropology, promoting innovative research on environmental theory and practice.
ANTH	110	Culture & Human Experience	Anthropology		1	This course looks at the diverse life-cycle experiences in tribal, state-level, and post-colonial societies to explore ways that tradition and contact with other cultures contribute to cultural pluralism of the contemporary world. This course relates to the environment in relation to the impact of the environment on human experience.
ANTH	215	Sex, Gender & Culture	Anthropology		1	The course examines how economic systems, social structures, and values construct and redefine biological distinctions between women and men. Factors, such as gender, politics, and social change are evaluated through the lens of environmental and societal norms.
ANTH	350	Environmental Anthropology	Anthropology	1		environmental focus within anthropology
ANTH	350	Food and Ecology	Anthropology	1		This course examines the technological and cultural connections to the environment and development. Students use ecology and social theory paradigms to examine industrial and alternative food networks, including their impacts on the environment, communities, and rural development.
PUBH	340	Fundamentals of Epidemiology	Biology	1		This course studies the patterns and determinants of disease in populations, as it relates to the environment. Through the use of epidemiological methods, including study design, calculation and interpretation of measures of frequency, association and public health impact, the purpose of this course is to teach students how to collect and analyze data based on an environment.
PUBH	110	Introduction to Public Health	Biology		1	This course explores the science behind public health and the role the government plays to ensure the population healthy. The course focuses on the environment, educating students on environmental affects, such as health disparities and food deserts.

BIO	210	General Biology II	Biology	1	This course explores the origins of planet Earth and life. This course relates to the environment through its study of various kingdoms and their phylogenetic relationships, the form and function of plants and animals, and the consideration of the interrelationships between organisms and environment.
BIO	100	Great Experiments in Bio	Biology	1	This course focuses on classic experiments that introduce students to the modern study of biology and scientific method. Students will conduct experiments with complex biologically important molecules, and the construction of demographic tables. The course will allow students to apply biology to their environment.
BIO	340	Marine Biology	Biology	1	This course explores the biology of marine organisms from a global perspective, in addition to the influence of geology, geography, currents, tides, waves, winds, salinity, and other parameters on the distribution of marine organisms. This course relates to the environment in its study of many environments, such as rocky shores, coral reefs, euarines, and beaches.
BIO	240	Oceanography	Biology	1	This course studies the sea from a global perspective, with an emphasis on chemical and physical oceanography as it affects life in the seas and the world economies. The course relates to the environment in relation to the course's introduction of climatology and meteorology.
PUBH	110	Introduction to Public Health	Biology	1	This course explores the science behind public health and the role the government plays to ensure the population healthy. The course focuses on the environment, educating students on environmental affects, such as health disparities and food deserts.
PUBH	480	Public Health Capstone	Biology	1	This seminar challenges students to examine all encompassing aspects of public health. Students with different interests within the field of public health will work together on a project and present it to the class and a panel of public health professionals. This seminar relates to the environment in terms of public health as it pertains to the environment, as well as the way a population's environment can affect their ability to receive healthcare and maintain optimal health and wellbeing.
BIO	323	Introduction to Ecology	Biology	1	This course explores the fundamental principles of ecology, with emphasis on the interaction of organisms and their environment at the level of individuals, populations, and communities, including energy flow through and nutrient cycling within ecosystems.
BIO	220	The Case for Evolution	Biology	1	This course explores the study of evolution- what it is, how and why it occurs, and what it tells us about the world around us. Students learn about the process of evolution and investigate why species change over time, both in their individual characteristics and their relative abundance, and examine how cultural and technological advances are influencing the current and future biological evolution of humans.
BIO	364	Evolution	Biology	1	This course explores the mechanisms of evolutionary change from genes to societies and how natural selection interacts with genetic and population processes such that organisms tend to become adapted to their environment and biological diversity increases. This course relates to the environment, as it introduces students to the principles of inheritance, genetic variation, and adaptation in accordance with the environment.
PUBH	396	Envirn Issues in Public Health	Biology	1	This course examines physical, chemical, and biological factors in the environment that impact community health and health behaviors. Students discuss the concept of risk assessment, in addition to how health supportive environments can be created and maintained.

PUBH	394	Urbanization and Public Health	Biology	1	This community service-learning project explores the effects of urbanization on the overall health of a populace. In this project, students learn about the effects of urbanization on the environment, with the purpose of affirming the association between the health of the environment to the overall health of the public.
PUBH	115	Why Aren't We Dead Yet?	Biology	1	This course discusses how microbes and lifestyle choices can make us sick, and the role of public health to keep us healthy. The course looks at global and reproductive health issues, in addition to the influence of environmental and public policy on health. The course is related to the environment, as it looks at how our environment impacts our health and examines diseases such as cholera, HIV/AIDS, diabetes, and cancer and their rates in relation to environment.
CHEM	490	Drug Transportation System	Chemistry	1	This independent study project in chemistry explores the effects of drug transportation on our society, straining the justice and healthcare systems and leading to environmental destruction.
CHEM	490	Hnrs Capstone-Lactam Synthesis	Chemistry	1	This independent study project in chemistry explores the synthetic methods for the synthesis of lactams. This course relates to the environment, as students explore the presence of lactam within the environment.
CHEM	310	Organic Chemistry I	Chemistry	1	This course explores the systematic treatment of hydrocarbons, alkyl halides, alcohols, carbonyl compounds, acids, and their derivatives. This course relates to the environment, as it incorporates proponents of the environment, such as the elements above.
CHEM	312	Organic Chemistry I Lab	Chemistry	1	This lab explores laboratory theory and practice in synthesis, separation, and purification of organic compounds. This lab pertains to the environment, as it incorporates elements and natural processes resulting from the environment.
CHEM	320	Organic Chemistry II	Chemistry	1	This course explores an introduction to polyfunctional compounds including amino acids, carbohydrates, lipids, and nucleic. The course relates to the environment in the exploration of different compounds and their derivatives.
CHEM	322	Organic Chemistry II Lab	Chemistry	1	This lab explores the synthesis of polyfunctional compounds, infrared and nuclear magnetic resonance spectra, and qualitative organic analysis that are directly related to the environment.
CHEM	490	Synthesis of Lipid Modulators	Chemistry	1	This independent study project in chemistry explores the novel antimicrobial compounds associated with lipid metabolism. This course relates to the environment, as students theorize and conduct studies surrounding the lipid environment.
CHEM	310	Organic Chemistry I	Chemistry	1	This course explores the systematic treatment of hydrocarbons, alkyl halides, alcohols, carbonyl compounds, acids, and their derivatives. This course relates to the environment, as it incorporates proponents of the environment, such as the elements above.
CHEM	312	Organic Chemistry I Lab	Chemistry	1	This lab explores laboratory theory and practice in synthesis, separation, and purification of organic compounds. This lab pertains to the environment, as it incorporates elements and natural processes resulting from the environment.
CHEM	320	Organic Chemistry II	Chemistry	1	This course explores an introduction to polyfunctional compounds including amino acids, carbohydrates, lipids, and nucleic. The course relates to the environment in the exploration of different compounds and their derivatives.
CHEM	322	Organic Chemistry II Lab	Chemistry	1	This lab explores the synthesis of polyfunctional compounds, infrared and nuclear magnetic resonance spectra, and qualitative organic analysis that are directly related to the environment.

CHEM	230	Earth Sciences	Chemistry	1	This course combines geology, geophysics, and geochemistry in describing the evolution of our planet, the deep structure of the earth, and interaction of the hydrosphere, biosphere and atmosphere. The course directly relates to the environment through earth studies of geology, geophysics and geochemistry.
COMM	369	Personal Branding/Online Ident	Communication, School of	1	This course teaches students how to manage a professional brand, both offline and on. Students will learn how to create a website, maintain, and manage their brand. With more employers searching for employees on social networks, a large focus is on digital branding. This course relates to the environment, as environmentally-friendly and sustainable brands and websites were used as an example. Some students then went on to create their own brand that surrounded the topic of sustainability.
COMM	437	Public Relations Portfolio	Communication, School of	1	In this course, students work together to create a PR portfolio for one client. The client is typically a non-profit organization. Together, students and the client work hand-in-hand, conducting weekly meetings, coordinating site visits, and connecting through email. Many of the clients that work alongside the students are environmental non-profit organizations.
COMM	496	Strat Comm & Event Management	Communication, School of	1	This course provides a practical and theoretical experience in strategically planning and managing the public relations process. Students gain the conceptual and analytical skills to understand the management of people, resources and organizational considerations, and the ability to manage in culturally diverse environments. This course is related to the environment in regards to the exposure to many different culturally diverse environments.
COMM	200	Writing for Communication	Communication, School of	1	This course stresses basic writing techniques and facilitates intensive practice in writing for print, web, broadcast, public communication and public service. Using examples from articles related to sustainability, this course is sustainability related.
COMM	490	Trash Island	Communication, School of	1	This independent study project in communication explores the excess trash that has accumulated, specifically around islands. This course examines the threat of land waste on our water, air, land, and wildlife.
COMM	70	Nature Photography	Communication, School of	1	This course explores technique for photographing animals, plants, and environmental subjects. Students attend discussions with editors and photographers from NBP and NBP Students Online. Students go on field trips to museums and nature preserves. Towards the end of the course, students compile all their work together and assemble a portfolio.
COMM	70	Weather Broadcasting	Communication, School of	1	This course allows students to experience life as a weather broadcaster, where they have the opportunity to hone in on both on-air and behind the scenes skills, such as writing and editing. This course relates to the environment, as the course requires students to report on the topic of weather and the changes in climate associated with our environment.
COMM	301	Public Relations	Communication, School of	1	This course explores the strategy and tactics involved in the realm of public relations. Students see how public relations works in such areas as business, society, entertainment, sports, politics, and the environment. This course relates to sustainability, as it covers public relations as a tool to promote environmental awareness.
COMM	476	Photojournalism & Social Doc	Communication, School of	1	This course allows students to explore the basics of visual language and how it is used and manifested in the craft of photojournalism. This course is sustainability related, as some of the visual images and documentaries presented to students are used as promotion for environmental awareness.

COMM	365	Digital Media and Culture	Communication, School of	1		This course examines the central role digital media technologies play in culture and society. Students explore the historical and contemporary theories about how digital media provide the structures in which individual identity is formed, social relations manifest, political discourse occurs, and economic power flows. This course relates to the environment through its examination of culture and society, and the ability for digital media technologies to manifest social relations, identities, and other factors that work together to make up an environment.
COMM	411	History of Documentary	Communication, School of	1		This course explores the development of the documentary form from early cinema to the digital era. This course relates to the environment as it presents the students with documentaries about the environment.
UCOL	100	Anthropology of Life in U.S.	DAA / Sr. Vice Provost	1		This course explores how one's race, gender, class, ethnicity, age, and region affect experiences of interwoven historical, economic, political, scientific religious, and cultural processes of people living in the U.S. This course relates to the environment in showing how an individual's circumstances affect their environment in a holistic way.
UCOL	200	Makengue Project	DAA / Sr. Vice Provost		1	The Makengue Project is an interdisciplinary learning experience that combines University College course work with an opportunity to travel to Makengue, Nicaragua, during spring break. Students research preservation, sustainability, and social justice and then present their findings through writing, film, and photography at the University College Spring Research Symposium.
GNED	120	The Examined Life	DAA / Sr. Vice Provost	1		This course explores the intersection of business, communication, and creativity. Students read and discuss nonfiction essays on the science and theory of creativity, experiment with the creative writing process, as well as learn techniques in story-telling and story-boarding. This course relates to the environment, as some of the essays discussed in class are on the topic of sustainability.
IDIS	196	AU Scholars Research Lab	DAA / Sr. Vice Provost	1	1	The topic varies by section; however, one of the topics offered, titled "Living in the Environment" is environmentally focused, while the others relate to sustainability.
UCOL	100	U.S. Society	DAA / Sr. Vice Provost	1		This course is designed to introduce students to the field of sociology, the exploration of society and how it operates. By thinking actively about the issues facing contemporary American society, students will learn to examine life situations and the influence of society and groups on people's lives, careers, hopes, fears, and personalities. This course relates to the environment in regards to its examination of society and the way Americans think, talk, feel, and act relative to the environment they fostered in the U.S.
UCOL	100	Sustainable Earth	DAA / Sr. Vice Provost	1		This course examines the issue of sustainability; what it means, how it is measured, and how it can be used to address environmental challenges. In doing so, the course builds on the most current scientific understanding of how natural world works.
UCOL	200	DC H2O	DAA / Sr. Vice Provost	1		This course falls under university college research lab, which gives students the opportunity to work alongside a faculty member and graduate assistant on their projects of choice. This particular research lab relates to sustainability, as it encompasses DC's water supply.
UCOL	200	Into the Collaboratory	DAA / Sr. Vice Provost	1		This course falls under university college research lab, which gives students the opportunity to work alongside a faculty member and graduate assistant on their projects of choice.
ECON	322	Applied Econometrics I	Economics	1		This course reviews probability, descriptive statistical inference, and hypothesis testing. This course relates to sustainability through the use of data collected from sustainability case studies.

ECON	480	Senior Research Seminar	Economics	1	This seminar covers research methods, the writing of economics, and presentation of research. The seminar ties in with the environment through the use of environmental related case studies.
ECON	458	Financial Issues in Latin Amer	Economics	1	This course studies the systemic financial issues in Latin America, including the fiscal banking currency and debt crises. The goal of this course is to tackle the fundamental causes of these crises, by focusing on economic policy and institutional shortcomings as well as other domestic and external circumstances that generate financial instability. This course relates to the environment through the use of case studies.
ECON	362	Microeconomics of Econ Devel	Economics	1	This course focuses on poverty and income distribution and includes coordination failures, credit and labor market imperfections, microcredit, health, food security, human capital accumulation, gender relations, property rights, transaction costs, and economics of the household. This course relates to the environment, as it touches the factors, such as health, food security, and property rights, that a developing country/environment deal with.
ECON	100	Macroeconomics	Economics	1	This course is an introduction to the basic principles of macroeconomics, stressing national income, unemployment, inflation, economic development, alternative approaches to economics, and current issues and controversies. This course relates to the environment in its use of sustainability case studies.
ECON	458	Econ, Envirn & Trade Pol in EU	Economics	1	In this course, students develop an in-depth working knowledge of economic, environmental and trade policies of the European Union (EU) and gain a greater understanding of the process and evolution of the European economic integration and its implications for the world. The first part of the course examines the EU's single market economic system; the second part focuses on the EU's environmental policies and their global implications, and the third part focuses on the EU's external relations including the transatlantic relationship. This course focuses on sustainability as it directly deals with EU's environmental policies.
ECON	458	Econ, Envirn & Trade Pol in EU	Economics	1	In this course, students develop an in-depth working knowledge of economic, environmental and trade policies of the European Union (EU) and gain a greater understanding of the process and evolution of the European economic integration and its implications for the world. The first part of the course examines the EU's single market economic system; the second part focuses on the EU's environmental policies and their global implications, and the third part focuses on the EU's external relations including the transatlantic relationship. This course focuses on sustainability as it directly deals with EU's environmental policies.
ECON	361	Economic Development	Economics	1	This course evaluates the meaning and measurement of economic development, theories of development and underdevelopment, and policies to alleviate poverty and promote development in the low and middle income countries of the world.
ECON	100	Macroeconomics	Economics	1	This course is an introduction to the basic principles of macroeconomics, stressing national income, unemployment, inflation, economic development, alternative approaches to economics, and current issues and controversies. This course relates to the environment in its use of sustainability case studies.
ECON	374	Gender Roles in the Economy	Economics	1	This course explores the gender dimensions of economic life. Students look at the roles of men and women in the community, the market, and the home life. Students examine how gender roles are affected by economic and social change. This course focuses on the environment, as gender is studied relative to its environment and the norms placed within that environment.

ECON	100	Macroeconomics	Economics	1	This course is an introduction to the basic principles of macroeconomics, stressing national income, unemployment, inflation, economic development, alternative approaches to economics, and current issues and controversies. This course relates to the environment in its use of sustainability case studies.
ECON	379	Economics of Environmental Pol	Economics	1	This course explores the relationship between economic activity and the natural environment; the meaning and implications of sustainable development. Topics include environmental protection, resource conservation, evaluation of environmental costs and benefits, and optimal management of natural resources.
ECON	322	Applied Econometrics I	Economics	1	This course reviews probability, descriptive statistical inference, and hypothesis testing. This course relates to sustainability through the use of data collected from sustainability case studies.
ECON	200	Microeconomics	Economics	1	This course explores the basic principles of microeconomics and its application; relates to the environment in its use of sustainability related case studies.
ECON	490	Puerto Rican Debt Crisis	Economics	1	This course falls under the independent study project in economics. This particular course delves into the factors that played into the Puerto Rican debt crises, relating to sustainability in terms of the environmental effects as a result of the debt crises.
ECON	363	Macroeconomics of Econ Devel	Economics	1	This course evaluates the rationale for and the effectiveness of different macroeconomic policies in a developing country setting. Factors, such as, exchange rates, monetary policy, fiscal policy, international trade, international capital markets, financial and exchange rate crises, and structural adjustment are taken into account. This course relates to the environment, as it analyzes and monitors the economic development of an environment through its policies and market system.
ECON	110	The Global Majority	Economics	1	This course introduces students to the plight of less-developed countries, to alternative paths of development, and to the relationships between the more-developed and less developed countries. The course is sustainability focused, as it introduces sustainability as an alternative path of development.
ECON	100	Macroeconomics	Economics	1	This course is an introduction to the basic principles of macroeconomics, stressing national income, unemployment, inflation, economic development, alternative approaches to economics, and current issues and controversies. This course focuses on the environment in its use of sustainability case studies.
ECON	200	Microeconomics	Economics	1	This course explores the basic principles of microeconomics and its application as it relates to the environment through its use of sustainability related case studies.
ENVS	300	Conservation	Environmental Science	1	This course examines conservation issues, as they relate to conservation of biodiversity. The course covers early conservation writing, the development of tools that are used in conservation, and the status of biodiversity.
ENVS	490	Learning & Teaching Science	Environmental Science	1	This course falls under the independent study project in economics. This particular course relates to the environment, as it explores the realm of environmental science.
ENVS	250	Living in the Environment	Environmental Science	1	This course is an introduction to environmental science, focusing on key principles that govern how nature works, the interactions between human society and ecosystems, and current and potential solutions to environmental problems.
ENVS	150	Sustainable Earth	Environmental Science	1	This course examines the issue of sustainability; what it means, how it is measured, and how it can be used to address environmental challenges. In doing so, the course builds on the most current scientific understanding of how natural world works.

ENVS	490	Zookeeper Demo Assessment	Environmental Science	1	This course falls under the independent study project in environmental studies. Students are introduced to zookeeping. This course is focused on the environment, as it delves into animal studies and the environment that allows them to best thrive.
ENVS	220	Energy and Resources	Environmental Science	1	This course opens a general discussion of the chemistry of our environment, including description of the ideal unpolluted environment and a historic view of pollution. Classes and interactions of pollutants with the environment are described.
ENVS	250	Living in the Environment	Environmental Science	1	This course is an introduction to environmental science, focusing on key principles that govern how nature works, the interactions between human society and ecosystems, and current and potential solutions to environmental problems.
ENVS	490	Ngos and Emerging Technologies	Environmental Science	1	This course falls under the independent study project in environmental studies. This particular section explores the rise of non-governmental organizations (NGOs) and their contribution to better the environment and other important causes.
ENVS	260	Intro to Environmental Sci II	Environmental Science	1	This course focuses on physical science aspects, such as geology, water and air pollution and their causes, solid waste, weather and climate, and both conventional and sustainable energy options. Emphasis is on sustainability and meeting environmental challenges. Laboratory relates to lecture topics, emphasizing quantitative tools to gather data for analysis and hypothetical testing, and developing models to project future status based on current information.
ENVS	250	Living in the Environment	Environmental Science	1	This course focuses on the natural world and how humans interact with and affect ecosystem components. The class examines conservation and management, the causes of pollution and potential solutions, and ethical and legal issues associated with environmental issues in order to provide well-supported outlines and justifications for each of the issues covered in the class.
ENVS	150	Sustainable Earth	Environmental Science	1	This course examines the issue of sustainability; what it means, how it is measured, and how it can be used to address environmental challenges. In doing so, the course builds on the most current scientific understanding of how natural world works.
ENVS	460	Climatology	Environmental Science	1	This course provides a detailed overview of the elements of climatology and the effects of pollution on the environment.
ENVS	492	Senior Capstone Environ Stds	Environmental Science	1	This capstone is an examination of two major sites of environmental concern, one being the Yellowstone Ecosystem and another being the Anacostia River. Students are expected to examine the environmental concerns and controversy from a variety of scientific and social perspectives.
ENVS	160	Intro to Environmental Sci I	Environmental Science	1	This course explores the history and overarching concepts of environmental science, such as energy sources, energy utilization, and efficiency, water resources and pollution, local and regional air pollution, and ozone depletion and global warming.
ENVS	490	Renewable Energy Kazakhstan	Environmental Science	1	This course falls under the independent study project in environmental studies. This particular section focuses on renewable energy in Kazakhstan.
ENVS	150	Sustainable Earth	Environmental Science	1	In this course, students examine the concept of sustainability and what it means to society, in addition to themselves as individuals. Additionally, students will survey current scientific understanding of natural systems and how this knowledge can be used to tackle these challenges.
ENVS	396	Ecological Applications	Environmental Science	1	This course falls under the independent study project in environmental studies.
ENVS	490	Geoengineering Researcher	Environmental Science	1	This course falls under the independent study project in environmental studies.

ENVS	490	Physiology of Seagrasses	Environmental Science	1	This course falls under the independent study project in environmental studies.
ENVS	490	Seagrass Ecology of Guam	Environmental Science	1	This course falls under the independent study project in environmental studies.
GNED	250	The Marine Environment	Environmental Science	1	This general education course explores the marine environment, learning about marine habitats and marine life. This course relates to sustainability in regards to its discussions on climate and marine ecosystems.
ENVS	490	Water Quality in Rock Creek	Environmental Science	1	This course falls under the independent study project in environmental studies.
ENVS	490	Removing Chemicals From Bay	Environmental Science	1	This course falls under the independent study project in environmental studies.
ENVS	410	Environmental Science I	Environmental Science	1	This course is an introduction to environmental science focusing on biological aspects of environmental science such as evolutionary biology, ecology and biodiversity, populations, food and agriculture, environmental health, and the impacts of climate change.
ENVS	410	Environmental Science I	Environmental Science	1	This course is an introduction to environmental science focusing on biological aspects of environmental science such as evolutionary biology, ecology and biodiversity, populations, food and agriculture, environmental health, and the impacts of climate change.
ENVS	465	Environmental Risk Assessment	Environmental Science	1	This course explores the nature and methods of environmental risk assessment through critical analysis of case histories. The scientific concepts and analytic methods of each case study are explored through solution to sets of specific problems. Case studies include statistical modeling of environmental risk factors.
ENVS	220	Energy and Resources	Environmental Science	1	This course examines environmental issues related to air, water, land, food, and global climate change.
HPRM	245	Multicultural Health	Health / Fitness	1	This course provides basic understanding of gender and cultural issues affecting health. Students learn about health disparities, how gender and cultural indicators affect behavioral risk, and the relationship between health and other factors such as religion, social class, acculturation, migration, and globalization. This course relates to the environment in its focus on how an individual's environment, in addition to other factors, impact their standard of health.
HFIT	250	Strategies in Stress Managemnt	Health / Fitness	1	This course explores the nature and causes of stress, its effect on the human body, and both cognitive behavioral approaches as well as relaxation techniques to control it. This course relates to the environment, as the holistic approaches to stress management offered surround the environment and emphasize the importance of being in nature.
HFIT	120	Beginning Martial Arts	Health / Fitness	1	This course is an introductory course for beginners to develop the basic skills of martial arts. In addition to practicing martial arts, students will learn about its rich history. This course relates to the environment in terms of the culture and history of martial arts.
HFIT	323	Issues in Women's Health	Health / Fitness	1	This course provides a basic understanding of gynecologic anatomy and physiology as well as female health conditions. Students learn about research areas, such as female cancers, menopause, infertility, lesbian health, minority health, sexually transmitted diseases, pregnancy, and sexual dysfunctions. Students develop their own health plan based on family history and personal lifestyle. This course relates to the environment in terms of studying about the impact women have on their environment.

HFIT	163	Yoga	Health / Fitness	1	This course aims to teach students about the practice of yoga. Combining physical activity and lectures, students learn breathing and relaxation techniques, proper alignment, stress reduction, and how to heighten physical and mental awareness. Part of the lectures and class time involve discussions around environmental activism and the relationship between yoga and the environment.
HFIT	494	Global Health Policy	Health / Fitness	1	This course presents a historical foundation for global health policies, the processes of systematic policy and formation and analysis, and the relationship between global health and social and economic development. This course focuses on the environment through study of environmental policy within the wider scope of global health policy.
HPRM	335	Health Promotion Prog Planning	Health / Fitness	1	This course provides students with an introduction to the basic principles of the development and implementation of health promotion programs. This course emphasizes health and lifestyle risk factors and the interventions associated with managing these risks. The course pertains to the environment in relation to the understanding of how environment affects a population's health, health education, and health literacy.
HPRM	325	Exercise Physiology	Health / Fitness	1	This course provides physiological perspectives of exercise and other forms of physical exercise, emphasizing the influences of aerobic and anaerobic exercise on the cardiovascular, digestive, neuromuscular, hormonal, and pulmonary physiological systems. This course relates to the environment, as it is often conducted outdoors and explores the ways in which health varies depending on the environment one belongs to.
HIST	490	Legal History of the South	History	1	This course falls under the independent study project in history.
HIST	215	Soc Forces Shaped Amer	History	1	This course explores the history of race, class, and gender in the United States from the late nineteenth century to the present. Class discussions surround how these forces exist and continue to exist, and their impact on social attitudes within the greater environment.
HIST	205	Amer Encounters:1492-1865	History	1	This course explores the history of the United States to 1865: the expansion and transplantation of European civilization, the Native American response, the sectional contest over slavery, the birth of the American feminist movement, and the beginnings of the industrial revolution. This course relates to the environment in terms of the cultural and historical circumstances that align with the time.
HIST	247	Muslim Empires 1300-1920	History	1	This course examines the rise and fall of the Ottoman, Safavide, and Mughal empires. The course investigates the imperial decline and emerging conflict between cosmopolitanism of the past and modern Western ideas of politics and society. The course is linked to the environment in terms of religion, government, and infrastructure.
HIST	396	Social Hist. of Middle East	History	1	This course falls under the independent study project in history; relates to the environment in regards to the cultural and historical context.
SISU	329	Global Economic Governance	International Service, School	1	This course explores the main international economic institutions that have been developed with the goal of managing conflicts, as well as the economic and financial forces that have driven the globalization process. The course relates to the environment in terms of how economic growth and globalization can spur and thrive from different environment, as opposed to others.

SISU	140	Cross-Cultural Communication	International Service, School	1	This class examines the impact of culture on communication, perception, thought patterns, values, and beliefs in order to understand individuals within different societies and the affect an environment has on an individual. Explores the environment through the lens of culture, ethnicity, race, class, and other forms of diversity within countries and organizations.
SISA	219	Dominican Rep: Haitian Iden	International Service, School	1	This course falls under the independent study project in International Service Study Abroad; focused on the environment in regards to the study of the environmental policy and issues within the Dominican Republic and how it affects the lives of the Haitian people and their identity.
SISU	490	Identities of Mixed Race	International Service, School	1	This course falls under the independent study project in International Studies. This course relates to the environment in regards to how an environment perceives those of mixed race.
SISU	490	Peace and Conflict Education	International Service, School	1	This course falls under the independent study for International Studies; relates to the environment in terms of how conflict resolution and peace can be maintained within an environment, depending on cultural, religious, and economic factors.
SISA	219	Striving for Education in Rio	International Service, School	1	The topic varies by section; however, this particular course focuses on the environment in terms of the environmental circumstances that may inhibit the ability for children to receive an education, such as lack of funds, lack of teachers, and cultural distinctions.
SISU	250	Env Sustainblty/Global Health	International Service, School	1	This course exposes students to a range of perspective and tools in the study of the global environment and global health, including market-based approaches, environmental justice, political economy, and sustainability assessment tools.
SISU	106	Environmental Ethics	International Service, School	1	This course contains topics that vary by section; however, this particular course focuses on the environment through the exploration of environmental dangers that challenge the moral quality of our lives.
SISU	210	Peace, Global Sec & Conflt Res	International Service, School	1	This course explores the central concepts of peace and conflict resolution, important theories of causes of conflict, and analyzes conflict from multiple perspectives. This course relates to the environment in terms of the notion that an environment dictates the nature of an individual's aggression, identity, and mobilization.
SISU	102	Global Public Health	International Service, School	1	The topic varies by section; however, this particular course relates to the environment through its exploration of global health policy and practice, such as the global burden of disease, in addition to organizational, economic, and political determinants of intervention.
SISU	102	Sustainability, Dev, & Design	International Service, School	1	The topic varies by section; however, this particular course focuses on the environment as it expands on the development and design of sustainable infrastructure and material items.
SISA	323	Econ, Envirn & Trade Pol in EU	International Service, School	1	The topic varies by section; however, this particular course focuses on the environment, as it explores the environment, the economy, and trade policy within the EU.
SISU	490	China's Expansion Plan Tibet	International Service, School	1	This course falls under the independent study for International Studies; focuses on the environment as it discusses the environmental changes that China plans to make.
SISU	106	Environment and Imagination	International Service, School	1	This course falls under the International Studies first year seminar. This course focuses on the environment through motivating students to think about environmental policy and change in a holistic way.

SISU	352	Environmental Politics of Asia	International Service, School		1	This seminar focuses on the environmental politics of Asia. It covers global, regional, and local environmental challenges. The class considers the impact of Asia's environmental problems, including air and water pollution, biodiversity loss, climate change, and ozone depletion through the theoretical lenses of international relations theory, environmental security, human security, and anthropology.
SISU	102	Global Public Health	International Service, School		1	The topic varies by section; however, this particular course relates to the environment through its exploration of global health policy and practice, such as the global burden of disease, in addition to organizational, economic, and political determinants of intervention.
SISU	348	Gender and Development	International Service, School		1	This course examines how development is gendered and creates different meanings, impacts, and processes for women around the world. Students explore the different theoretical approaches used in understanding women's situations in developing societies and examine the impact of production and reproduction, politics, globalization, environment, and migration. This course relates to the environment, as one of the major factors discussed is women's experiences around the world, due to her environment.
SISU	306	International Courts	International Service, School		1	This course falls under International studies advanced international studies research, with topics varying by section; however, this particular section provides students with an understanding of how international courts work. This course relates to the environment, as students learn about the varying environmental policies.
SISU	310	Migration and Security	International Service, School		1	The topic varies by section; however, this particular course relates to the environment in terms of people moving from one environment to another and their transition into this new culture and lifestyle.
SISU	102	Global Public Health	International Service, School		1	The topic varies by section; however, this particular course relates to the environment through its exploration of global health policy and practice, such as the global burden of disease, in addition to organizational, economic, and political determinants of intervention.
SISU	102	Sustainability, Dev, & Design	International Service, School		1	This topic varies by section; however, this particular course focuses on the environment as it expands on the development and design of sustainable infrastructure and material items.
SISU	250	Env Sustainblty/Global Health	International Service, School		1	This course exposes students to a range of perspective and tools in the study of the global environment and global health, including market-based approaches, environmental justice, political economy, and sustainability assessment tools.
SISU	431	Conf Res in Middle East Sem I	International Service, School		1	The topic varies by section; however, this particular course relates to the environment, as it explores conflict resolution in the Middle East based on the environmental, cultural, and religious factors.
SISU	431	Conf Res in Middle East Sem II	International Service, School		1	This course is a continuation of the course directly above.
SISU	431	Conf Res Middle East Res Proj	International Service, School		1	This project concludes the two semester course on Conflict Resolution within the Middle East.
SISU	419	Emerg Technologies & Environ	International Service, School		1	This capstone varies by section; however, this particular capstone relates to the environment as it explores the innovative technology that works to improve the environment.
SISU	102	Global Public Health	International Service, School		1	This topic varies by section; however, this particular course relates to the environment through its exploration of global health policy and practice, such as the global burden of disease, in addition to organizational, economic, and political determinants of intervention

SISU	318	Causes of War	International Service, School	1	This topic varies by section; however, this particular course evaluates the causes of war, including environmental, economic, and religious factors.
SISU	419	Voices of Terror	International Service, School	1	This capstone evaluates the voices of terror worldwide; students shine light on the oppression suffered by these populations, whereby the terror they experience most often results from their environment.
SISU	368	Differn/Similarit in Conf Res	International Service, School	1	This course on conflict resolution examines our interdependent world and fosters greater intercultural awareness and communication. This course relates to the environment, as it encourages students to explore thier sense of identity, attitudes, and behavioral choices relative to their environment.
SISU	106	Apple in the Global Economy	International Service, School	1	The topic varies by section; however, this particular course
SISU	390	Case Studies/ Sustainable Bdg	International Service, School	1	This course is an independent reading course in International studies, whereby the topics change each semester. This particular course, however, focuses on the environment, as it evaluates the sustainable infrastructure and uses case studies as examples.
SISU	250	Env Sustainblty/Global Health	International Service, School	1	This course exposes students to a range of perspective and tools in the study of the global environment and global health, including market-based approaches, environmental justice, political economy, and sustainability assessment tools.
SISU	106	Global Cities	International Service, School	1	The topic varies by section; however, this particular course explores the nature of fourteen global cities. The class examines their social, political, and economic processes through consideration of urban form and culture and the disruptions of climate change, migration, and social transformation. This course relates to the environment, as it delves into climate change.
SISU	350	Sustainable Cities	International Service, School	1	The topic varies by section; however, this particular course identifies the components and characteristics of sustainable cities and compares and contrasts the differences between sustainable urban systems versus conventional ones.
SISU	350	Tourism and Globalization	International Service, School	1	The topic varies by section; however, this particular course examines the relationship between culture, communication and the political economy of tourism. This course relates to the environment, as it delves into ecotourism.
SISU	140	Cross-Cultural Communication	International Service, School	1	This class examines the impact of culture on communication, perception, thought patterns, values, and beliefs in order to understand individuals within different societies and the affect an environment has on an individual. Explores the environment through the lens of culture, ethnicity, race, class, and other forms of diversity within countries and organizations.
SISU	350	Int'l Environmental Politics	International Service, School	1	The topic varies by section; however, this particular course explores international policy regarding the environment.
SISU	212	China, Japan & the U.S.	International Service, School	1	This course is a multidisciplinary introduction to China and Japan that explores the history, culture, social structure, literature, art, politics, economics, and foreign relations of these important countries. This course relates to the environment, as it explores the many facets of Chinese and Japanese culture and environment.
SISU	372	Human Rights in East Asia	International Service, School	1	This course considers the issues of human rights and culture in East Asia, questioning how culture and tradition affect the experience of living in the East Asian environment and the rights received.

SISU	206	Intro to Int'l Studies Rsrch	International Service, School	1	This course introduces scientific method, data gathering, research design, statistical analysis, and computer applications for international relations and comparative studies research. This course relates to the environment, as it requires students to delve into a research topic of their choice, often associated with the environment.
SISU	306	Qualitative Analysis	International Service, School	1	This course teaches students to apply research methods in international studies to an original research project. This course relates to the environment, as it explores a culture's environment and discusses sustainability within that culture.
SISU	130	Intercultural Understanding	International Service, School	1	This course introduces students to the field of intercultural communication, offering a balanced mix of competency development and academic understanding of the subject area. This course is focused on the environment, as it delves into the intercultural aspects that make up an environment.
SISU	106	Agrarianism in the Americas	International Service, School	1	The topic varies by section; however, this particular course explores the agrarian revolution in the Americas. Students learn about the agriculture industry and its transition from hand labor to machine farming, and how that affected America's food production and society.
SISU	490	H2O Greens	International Service, School	1	The course falls under an independent study project in International studies. This particular course, however, focuses on the utilization of outdoor space by installing hydroponic gardens.
SISU	350	Pol Ecol of Food & Agriculture	International Service, School	1	The topic varies by section; however, this particular course explores workings of the global industrial food system. The main objective of this course is to get students to about the future of food, through an exploration and evaluation of a range of visions for a safe, sustainable food system.
SISU	106	Globalization 3.0	International Service, School	1	The topic varies by section; however, this particular course ex
SISU	102	Global Public Health	International Service, School	1	The topic varies by section; however, this particular course relates to the environment through its exploration of global health policy and practice, such as the global burden of disease, in addition to organizational, economic, and political determinants of intervention.
SISU	102	Sustainability, Dev, & Design	International Service, School	1	The topic varies by section; however, this particular course focuses on the environment as it expands on the development and design of sustainable infrastructure and material items.
SISU	216	Contemporary Russia	International Service, School	1	This course is related to the environment, as it explores Russia's contemporary political culture and its historical, economic, geographic, and social roots.
SISU	340	Marginalization & Conservation	International Service, School	1	The topic varies by section; however, this particular course relates to the environment as it focuses on conservation within countries that are marginalized.
SISU	102	Sustainability, Dev, & Design	International Service, School	1	The topic varies by section; however, this particular course focuses on the environment as it expands on the development and design of sustainable infrastructure and material items.
SISU	240	International Development	International Service, School	1	This course covers the history of the field of international development from colonialism to current issues. This course relates to the environment, as it delves into the environmental concerns inhibiting international development.
SISU	130	Intercultural Understanding	International Service, School	1	This course introduces students to the field of intercultural communication, offering a balanced mix of competency development and academic understanding of the subject area. This course is focused on the environment, as it delves into the ways in which an environment affects one's ability to communicate interculturally.

SISU	360	Discourse & Power in Int'l Dev	International Service, School	1	The topic varies by section; however, this particular course focuses on power and discourse within international development, focusing on class, status, gender, culture, and religion. This course relates to the environment, as students explore different factors that contribute to an environment.
SISU	419	Agriculture to Agribusiness	International Service, School	1	The topic varies by section; however, this particular capstone reflects on the legal considerations affecting production, such as environmental control and the processing and distribution of agricultural and animal products to feed the world.
SISU	250	Env Sustainblty/Global Health	International Service, School	1	This course exposes students to a range of perspective and tools in the study of the global environment and global health, including market-based approaches, environmental justice, political economy, and sustainability assessment tools.
SISU	490	Intersection of Food & Culture	International Service, School	1	This topic falls under the independent study project in International Studies. The course explores food, ideology, identity, and media in America; relates to the environment in regards to the association between American environment and culture and the food Americans consume.
SISU	102	Globalization & Int'l Business	International Service, School	1	The topic varies by section; however, this particular course focuses on how globalization intersects with other areas such as economic development, political science, the environment and gender issues.
SISU	490	Separatism, Power & South Asia	International Service, School	1	The topic varies by section; however, this particular course delves into South Asia and its sustainable developments.
SISU	490	Themes & Concepts in Africa	International Service, School	1	The topic varies by section; however, this particular course covers the themes of Africa, including state, society, economy, and international affairs. The course poses important questions on the governance, the roles of civil society, and ethnic and communal diversity. This course focuses on the environment, as it explores the multifaceted components that add up to the nature of Africa.
SISU	419	Environment, Conflict, & Peace	International Service, School	1	The topic varies by section; however, this particular capstone focuses on the emerging interdisciplinary field of environmental peacemaking, with a focus on relationship-building between conflict actors. The capstone examines the interactions among violence, conflict, peace, security, and the natural environment.
SISU	106	Water in World Politics	International Service, School	1	The topic varies by section; however, this particular course focuses on cross-national dimensions of water politics and policy. A major theme includes water and climate change.
SISU	230	Analysis of US Foreign Policy	International Service, School	1	This course examines the history of U.S foreign relations, the institutions and politics involved in the formulation and implementation of U.S foreign policy. This course is environmentally focused, as it explores environmental policy.
SISU	324	Breakfast in the Americas	International Service, School	1	The topic varies by section; however, this particular course introduces students to the lives of commodity company owners, producers, and consumers, and trace the role coffee, sugar, and bananas have played in the historical development of the western hemisphere. In the process, they also explore environmental issues, globalization, price fluctuations, and terms of trade in Latin America.
SISU	106	Living in a Walmart World	International Service, School	1	The topic varies by section; however, this particular course focuses on the consumerism within America and the corporation that is Walmart.
SISU	419	The Honeybee & Int'l Relations	International Service, School	1	This course focuses on honeybees as both a metaphorical and pragmatic example through which to view broader international relations issues such as sustainable development, commodities and the global economy, labor and migration, and democratic processes.

SISU	343	Third World Cities	International Service, School	1	This course sets out to understand and analyze the dimensions and challenges of the rapidly growing cities and mega-cities of the Third World, giving attention to topics such as poverty, unemployment, housing, water, infrastructure, revenue, health, and the environment.
SISU	102	Global Public Health	International Service, School	1	The topic varies by section; however, this particular course relates to the environment through its exploration of global health policy and practice, such as the global burden of disease, in addition to organizational, economic, and political determinants of intervention.
SISU	102	Sustainability, Dev, & Design	International Service, School	1	The topic varies by section; however, this particular course focuses on the environment as it expands on the development and design of sustainable infrastructure and material items.
SISU	320	Economic Inequality & Devel	International Service, School	1	The topic varies by section; however, this particular course focuses on economic inequality and development, focusing on sustainable development.
ITEC	350	Digital Leadership & Strategy	Kogod: Info Technology	1	In this course, students learn what it takes to be an effective leader in the digital economy and how organizations strategically use information and digital technologies to improve their performance. This course is related to sustainability through case studies that are used as examples throughout the course.
ITEC	355	Production/Operation Mgmt	Kogod: Info Technology	1	This course explores production and operations management (POM), which refers to the management of all activities and processes involving materials, people, capital, information, and other resources in order to produce goods and provide services. This course relates to the environment through the use of sustainability related case studies, which expand on sustainable operations.
IBUS	423	Int'l Business & Trade Intern	Kogod: International Business	1	This internship gives students the opportunity to intern with one of many national and multinational agencies and organizations while participating in this program. This internship is sustainability related, as many students choose to intern with environmental organizations or tackle environmental policy in their respective internships.
IBUS	420	Int'l Business & Trade Sem I	Kogod: International Business	1	This seminar provides an in-depth introduction to the nature and workings of international business and trade. The seminar also teaches students about the functional operations of international business, such as marketing, HRM, finance, accounting, and international law. This course relates to the environment in regards to the work on environmental policy within international business.
IBUS	421	Int'l Business & Trade Sem II	Kogod: International Business	1	This seminar is a continuation of the description above.
IBUS	200	The Global Marketplace	Kogod: International Business	1	This course focuses on the key issues in the global business environment, as well as global corporate strategy and operations. These issues include the global role of the corporation, globalization, internationalization, international trade, foreign direct investment, multilateral institutions, the international monetary system, and political, economic, and cultural difference.
IBUS	490	E-business Models for SME's	Kogod: International Business	1	This course falls under the independent study project in International Business. This course focuses on the online presence that small-to-medium enterprise hold within the field of business. This course relates to the environment in regards to how the business world thrives based on its environment.

IBUS	408	Export-Import Management	Kogod: International Business	1	This course explores the management of the marketing processes of export/import operations, particularly for small and medium size firms. This course is focused on the environment, as it delves into the business and marketing environment and understanding the tools to implement marketing selection strategies for a target audience by feeling out their environment and needs.
IBUS	200	The Global Marketplace	Kogod: International Business	1	This course focuses on key issues in global business environment, as well as global corporate strategy and operations. Topics include globalization, internationalization, international trade, and politic, economic, and cultural differences. This course relates to the environment, as it explores the international business environment.
IBUS	490	Women in Arab Business	Kogod: International Business	1	This course falls under the independent study project in International Business. The course explores the role Arab women play in the global business environment, focusing on the environment as a social and cultural indicator of how Arab women are perceived within the business world.
IBUS	401	Cultural Envir of Int Business	Kogod: International Business	1	This course explores the cultural factors affecting international business operations and their influence on the principal business functions of finance, marketing, procurement, production, public and external relations, and research and development. This course focuses on the environment, as it delves into external relations and cultural factors that affects the international business environment.
IBUS	300	Fundamentals of Int'l Business	Kogod: International Business	1	This survey course explores the nature and scope of global trade and investment- the international monetary system and exchange markets, and differences in national cultures in providing in the environment in which trade and investment and take place. The course additionally focuses on the impacts that this environment has on the operating decisions of multinational enterprises.
IBUS	200	The Global Marketplace	Kogod: International Business	1	This course focuses on the key issues in the global business environment, as well as global corporate strategy and operations. These issues include the global role of the corporation, globalization, internationalization, international trade, foreign direct investment, multilateral institutions, the international monetary system, and political, economic, and cultural difference.
IBUS	96	Global Project	Kogod: International Business	1	The topic varies by section; however, this particular course
GNED	230	Global Sustainability	Kogod: International Business	1	This course falls under general education area topic 3, whereby students explores the environmental policy and sustainability indicators that are held worldwide.
MGMT	383	Entrepreneurship Business Plan	Kogod: Management	1	This course helps students understand the principles for developing entrepreneurial business plans to successfully create, build, and manage a new venture. This course relates to the environment, as it teaches students how to assess and implement a thriving business environment.
MGMT	469	New Venture Startup	Kogod: Management	1	This course focuses on the important components of an entrepreneurial business plan through the lens of critical operational, financial, and legal strategies and execution. This course realtes to the environment, as it teaches students about the multifaceted business environment.
MGMT	417	Sustainability Systems	Kogod: Management	1	This course provides a general understanding of key legal, regulatory, and policy issues that relate to the concept of sustainability across three primary tracks: business, science, and policy. The course provides a foundational background that focuses on sustainability and its interplay with related legal and regulatory principles.

MGMT	305	Music Publishing and Copyright	Kogod: Management	1	This course provides an introduction to the basics of the rights that composers and lyricists receive under U.S Copyright Law and the role of the music publisher in popularizing songs. This course relates to the environment, as it focuses on the ins and outs of the business and music environment.
MGMT	360	Nonprofit/Soc Entrepreneurship	Kogod: Management	1	This course focuses on entrepreneurship's actual and potential contribution to changing lives, improving the environment in which we live, and its contribution to overall national, regional, and local economic and social development.
MGMT	458	Business Policy and Strategy	Kogod: Management	1	This course focuses on the integration of knowledge in functional areas of business and simulation of management experiences. Various methods of stimulating a management environment are employed, including case studies and computerized management problems. This course relates to the environment in terms of its focus on creating a management environment.
MGMT	361	Global Entrepreneurship	Kogod: Management	1	This course explores the complex considerations in developing, starting, and growing an entrepreneurship enterprise in multiple contexts and cultures. This course relates to the environment, as it incorporates case studies that focus on healthy and inclusive business environments.
MGMT	201	Global Corporate Citizenship	Kogod: Management	1	This course prepares students to be managers and leaders of businesses that practice good citizenship in the global economy. This course relates to the environment, as it leads students to understand the complexity of the business environment.
MGMT	484	Consulting & Project Mgmt	Kogod: Management	1	This course provides critical skills for consulting and project management in business, government, and other organizations. Through the introduction of successful management consulting projects, developing and managing client relationships, project definition, building a project team, and planning, students are introduced to the pillars that make up a thriving business environment.
MGMT	353	Mgmt & Organizational Behavior	Kogod: Management	1	This course provides a broad framework and skills for managers in a variety of contexts, including organizational goals and responsibilities, models, decision theory, planning, control, motivation, leadership, group behavior, team skills intensive, conflict, and organizational change. This course sets an example of how a healthy and thriving business environment should function.
MGMT	201	Global Corporate Citizenship	Kogod: Management	1	This course prepares students to be managers and leaders of businesses that practice good citizenship in the global economy. This course relates to the environment, as it leads students to understand the complexity of the business environment.
MGMT	458	Business Policy and Strategy	Kogod: Management	1	This course focuses on methods of stimulating a management environment are employed, including case studies and computerized management problems. This course relates to the environment, as it teaches students how to thrive in a managerial environment.
MGMT	201	Global Corporate Citizenship	Kogod: Management	1	This course prepares students to be managers and leaders of businesses that practice good citizenship in the global economy. This course relates to the environment, as it leads students to understand the complexity of the business environment.
MGMT	458	Business Policy and Strategy	Kogod: Management	1	This course focuses on methods of stimulating a management environment are employed, including case studies and computerized management problems. This course relates to the environment, as it teaches students how to thrive in a managerial environment.

MGMT	201	Global Corporate Citizenship	Kogod: Management	1	This course prepares students to be managers and leaders of businesses that practice good citizenship in the global economy. This course relates to the environment, as it leads students to understand the complexity of the business environment.
MGMT	230	Global Sustainability	Kogod: Management	1	This course falls under general education area topic 3, whereby students explore the environmental policy and sustainability indicators that are held worldwide.
MKTG	301	Consumer Behavior	Kogod: Marketing	1	This course explores the study of marketing, psychology, sociology, and cultural anthropology to determine motivations for product purchases. Through a multimedia approach, students learn to analyze consumer decisions for products or services and to determine effectiveness of information provided by government and charitable organizations. This course relates to the environment through the lens of the marketing, business, and consumer environments.
MKTG	301	Consumer Behavior	Kogod: Marketing	1	This course explores the study of marketing, psychology, sociology, and cultural anthropology to determine motivations for product purchases. Through a multimedia approach, students learn to analyze consumer decisions for products or services and to determine effectiveness of information provided by government and charitable organizations. This course relates to the environment through the lens of the marketing, business, and consumer environments.
MKTG	250	Marketing & Business for Comm	Kogod: Marketing	1	This course provides an introduction to the fundamentals of marketing and business relevant to media and communications. Includes an overview of the principles of marketing, business environment, and business strategy and an introduction to microeconomics and financial statements. This course relates to the environment through the lens of a business environment.
WRTG	100	College Writing	Literature	1	This course aims to improve students' skills in reading and understanding, summarizing, and synthesizing information correctly, while being able to write on a college level. This course pertains to the environment, as students often read articles and books about the environment and sustainability.
WRTG	101	College Writing Seminar	Literature	1	This seminar continues the work that began the previous semester in terms of reading, writing, and comprehension, yet this semester, students are able to sign up for whichever seminar topic interests them. The seminar topics range from many different interests. One seminar that is offered is centered around sustainability.
WRTG	106	College Writing, Intensive	Literature	1	This intensive course works to develop students' academic writing and research skills, building students' abilities to construct extended arguments and synthesize diverse materials. This course relates to the environment through the curriculum, including educational articles and works by environmental activists.
MATH	211	Applied Calculus I	Mathematics / Statistics	1	This course explores the functions, differentiation, and integration of calculus. Students are taught how to apply concepts and functions they have learned to real world situations, especially within business. This course relates to the environment through the application of calculus to the business environment.
STAT	202	Basic Statistics	Mathematics / Statistics	1	This course focuses on data presentation, display, averages, dispersion, probability, sampling distributions, confidence intervals, and tests of significance. The course relates to the environment, as it uses sustainability related case studies as its data.

STAT	202	Basic Statistics - BUS/ECON	Mathematics / Statistics	1	This course focuses on data presentation, display, averages, dispersion, probability, sampling distributions, confidence intervals, and tests of significance. The course relates to the environment, as it uses sustainability related case studies as its data.
STAT	202	Basic Statistics: General	Mathematics / Statistics	1	This course focuses on data presentation, display, averages, dispersion, probability, sampling distributions, confidence intervals, and tests of significance. The course relates to the environment, as it uses sustainability related case studies as its data.
MATH	170	Precalculus Mathematics	Mathematics / Statistics	1	This course explores the fundamentals of algebraic, logarithmic, exponential, and trigonometric functions. The curriculum relates to the environment through the use of sustainability related data.
MATH	490	Honors Capstone: Tomography	Mathematics / Statistics	1	This course falls under the independent study project in mathematics. This course relates to the environment as it incorporates statistical examples that are sustainability related.
MATH	420	Intro to Analysis	Mathematics / Statistics	1	This course develops the foundations of mathematical analysis by focusing on the real numbers as a complete ordered field, infinite sequences and series, limits and continuity, and key theorems of the differential and integral calculus. This course relates to sustainability as it incorporates statistical examples that are sustainability related.
MATH	460	Tools of Scientific Computing	Mathematics / Statistics	1	This course is designed to teach scientific rigor in the use of computer and/or computational tools. Techniques from mathematics are introduced which lead to efficient algorithm design, algorithm analysis, data classification, data manipulation, and scientific computation. This course relates to the environment as it incorporates statistical examples that are sustainability related.
GNED	210	Theater as Protest	Performing Arts	1	This course falls under general education area topic 1. This course will explore various manifestations of that perspective through reading and analyzing modern/contemporary plays and interaction with professionals in the field. The course will be divided into units focusing on oppression that stems from race, class, gender, and political/social issues. This course relates to the environment, as it incorporates characteristics that make up an environment.
PHIL	211	Intro to Asian Philosophy	Philosophy / Religion	1	This course delve into Eastern philosophy on being, world, society, and ethics, and examine Eastern philosophers' views on the nature of self, personhood, politics, family, and gender; logics, religion, and cosmology. This course relates to the environment in terms of how Eastern philosophy perceives society and its inhabitants.
PHIL	241	Bioethics	Philosophy / Religion	1	This course introduces the growing field of bioethics, examining the ethial implications of recent developments in bio-medical technology, as well as the ethical lessons of historical cases. This course relates to the environment, as it covers cases and ethical lessons that focus directly on the environment.
PHIL	398	Honors Capstone in Philosophy	Philosophy / Religion	1	This course falls under an honors project in Philosophy. This course relates to the environment, as it explores societal and cultural perceptions.
SPA	370	Amer Environ Policy & Politics	Public Affairs, School of	1	This course introduces the issues, institutions, and processes that determine environmental policy in the U.S.
EDU	96	Bilingual and ESL Methods	School of Education	1	The topic varies by section; however, this particular course focuses on bilingual identites and ESL, and the cross-cultural interactions among the two. This course focuses on the environment, as it approaches the cultural and environmental considerations and challenges with both bilingual identities, in addition to ESL.

EDU	488	Foreign Language	School of Education	1	This course is the first part in a two-part sequence designed to develop knowledge and understanding of effective instruction and classroom management in secondary education. The course addresses the methods, materials, and management of secondary school subjects. This course relates to the environment through the use of sustainability related case studies.
EDU	96	Bilingual and ESL Methods	School of Education	1	The topic varies by section; however, this particular course focuses on bilingual identities and ESL, and the cross-cultural interactions among the two. This course focuses on the environment, as it approaches the cultural and environmental considerations and challenges with both bilingual identities, in addition to ESL.
EDU	285	Education for Int'l Devel	School of Education	1	This course focuses on the conserving role of education as a socializing agent, in addition to the liberating role of education as an engine of change. Class discussion surround the role of education in social, economic, political, and human development in the developing world. This course is sustainability related, as some of the books discussed throughout class focus on the environment within different, less developed countries.
EDU	499	Student Teaching Sem Prof Prac	School of Education	1	This seminar prepare students to develop ideas and strategies to improve their classroom effectiveness. Preparation of a reflective case study and completion of a professional portfolio and an on-line journal are required. This course relates to the environment in terms of analyzing and structuring classroom environments and teacher to student relationships.
EDU	490	Independent Study in Education	School of Education	1	The independent study project in education relates to the environment, as it explores different learning environments and teaching styles depending on the group of students and their needs.
SPEX	55	Applied Leadership	School of Prof / Extd Studies	1	This course explores the concept of applied leadership and its role in advancing social change on a micro and macro level. Through hands-on activities, experiential learning pedagogy, students create a community-based project of their choice. This course relates to the environment in terms of creating a learning environment whereby students reflect on their leadership potential and responsibilities.
SPEX	196	Intro to College Inquiry	School of Prof / Extd Studies	1	The topic varies by section; however, this particular course focuses on research. This course relates to the environment, as it incorporates case studies that are sustainability related.
SPEX	51	Women and Leadership	School of Prof / Extd Studies	1	This course builds women's understanding of leadership challenges and opportunities at the societal, political, and economic levels, and increases women's self-confidence and ability to apply proven leadership strategies to their own professional and/or personal lives. The course provides students with an understanding of the current discourse on women's leadership, highlighting common trends and behaviors that affect leadership opportunities for women, and assist women in developing strategies and tactics to attain their leadership potential. This course relates to the environment in regards to a woman's experience within her environment in terms of societal, political, and economic factors and challenges.
SOCY	150	Global Sociology	Sociology	1	This course is an introduction to sociology that focuses on the process of global social change as a critical factor in understanding contemporary societies. This course relates to the environment in its emphasis on today's global society, including the similarities and differences within it.

SOCY	150	Global Sociology	Sociology	1	This course is an introduction to sociology that focuses on the process of global social change as a critical factor in understanding contemporary societies. This course relates to the environment in its emphasis on today's global society, including the similarities and differences within it.
SOCY	490	DC Women's Health	Sociology	1	This course falls under the independent study project in sociology. This particular course uncovers the health status of women living in DC, in addition to the health education and services granted to them. This course relates to the environment, as it directly shows how a woman's environment can affect her ability to receive care, as well as her knowledge and health efficacy.
SOCY	490	Lifespan Health Systems	Sociology	1	This course falls under the independent study project in sociology. This particular course explores health systems within the U.S. This course relates to the environment, as it explores how different environments holds different standards of health and health education.
SOCY	335	Sociology of Birth and Death	Sociology	1	This course examines the sociological dimensions of human "entry and exit." It focuses on how society supports, controls, and constrains our arrival into and departure from the social world. This course relates to the environment, as it explores the social, organizational, and cultural dimensions of birth and death within an environment and their varying meaning depending on the environment and culture.
SOCY	100	U.S. Society	Sociology	1	This course explores how organizations and institutions influence the way Americans think, talk, feel, and act; and how different groups (racial and ethnic) and divisions (gender and class) within society have differential access to power and privilege. This course relates to the environment in showing how each environment holds different beliefs and feelings towards different groups and divisions.
SOCY	396	Health & Rights in Global Persp	Sociology	1	The topic varies by section; however, this particular course delves into the right to healthcare and access to health services from a global perspective. This course relates to the environment, as it shows how different environments hold different standards of health.
JLC	422	Advocate: Offenders in Society	SPA Justice, Law / Criminology	1	This course is an in-depth study of the philosophy, organizational structure, and operation of various institutions in the justice field, employing direct observation through on-site visits and discussions with officials, along with theoretical material. This course is focused on the environment in terms of the sustainability related case studies incorporated into the class curriculum.
JLC	411	Legal History Seminar	SPA Justice, Law / Criminology	1	This course introduces students to the comparative study of legal history with a primary focus on the civil and common law traditions. This course is sustainability related due to the sustainability related case studies used during class.
JLC	490	Modern Constitutional Thought	SPA Justice, Law / Criminology	1	This course falls under the independent research in justice. This course relates to the environment, as it incorporates case studies that are sustainability related.
JLC	490	The Conciliar Reform Movement	SPA Justice, Law / Criminology	1	This course falls under the independent research in justice. This course relates to the environment, as it incorporates case studies that are sustainability related.
JLC	110	Western Legal Tradition	SPA Justice, Law / Criminology	1	This course examines the key legal documents and issues of the tradition including the Code of Hammurabi, the Ten Commandments, the trials of Socrates and Jesus, the Magna Carta, the Rule of Law, and Common Law. This course related to the environment, as the course incorporates case studies that are sustainability related.

JLC	451	Drugs, Crime & Public Policy	SPA Justice, Law / Criminology	1	This course reviews the history of drug abuse in America, the relationship between drug abuse and crime, including marijuana, heroin, and alcohol, national strategies to deal with drug abuse, improvement of policies in the future. This course relates to the environment, as it brings forth the idea of why those of certain environments tend to abuse drugs.
JLC	309	Justice and Public Policy	SPA Justice, Law / Criminology	1	This course analyzes the structure of the legal profession from U.S. and cross-cultural perspectives, including the structure and organization of the bar, the social hierarchy of the profession, ethical and moral issues faced by lawyers, the changing status of women and minorities in the profession, and access to legal services for the poor. This course relates to the environment in regards to the hierarchical, racial, and gender distinctions within the legal system in the U.S. that differ in other countries.
GOVT	490	Justifying Inequality?	SPA: Government	1	This course falls under the independent study project in government. This course relates to the environment, as it incorporates case studies that are sustainability related.
HNRS	490	Advanced Concepts Islamic Fina	University Honors / Scholars	1	This course falls under the honors independent study project. This course relates to the environment, as it incorporates case studies that are sustainability related.
HNRS	498	Global Health	University Honors / Scholars	1	This capstone explores global health policy and practice. The capstone relates to sustainability, as the standard of health can be dictated through the environmental health and wellbeing of the community.
HNRS	200	Climate Chng Sci/Politics/Pol	University Honors / Scholars	1	This course exposes students to a range of perspectives and tools in the study climate change, policy, and global environment, including market-based approaches, environmental justice, political economy, and sustainability assessment tools.
HNRS	498	Us Agricultural Policy	University Honors / Scholars	1	The topic varies by section; however, this particular capstone reflects on the legal considerations affecting production, such as environmental control and the processing and distribution of agricultural and animal products to feed the world.
HNRS	300	Nicaragua: Unfinished Revol	University Honors / Scholars	1	The topic varies by section; however, this particular course explores the documentary titled, "Nicaragua: An Unfinished Revolution." The documentary exposes the conflict between the United States and Nicaragua. The course relates to the environment in terms of cultural and politics norms that make up an environment.
HNRS	498	Cause of Env. Problem in China	University Honors / Scholars	1	This capstone relates to the environment as it discusses the environmental changes that China plans to make.
HNRS	302	Environment and Development	University Honors / Scholars	1	This course focuses on the environment as it expands on the development and design of sustainable infrastructure and material items.
HNRS	300	The Idea of Nature	University Honors / Scholars	1	The topic varies by section; however, this particular course explores nature in a philosophical sense. The relationship between nature and religion is analyzed. This course relates to the environment, as students come to find how different religious perspectives generate different environment relations.
HNRS	210	Forensic Science/Criminal Just	University Honors / Scholars	1	The topic varies by section; however, this particular course focuses on forensic science/criminal justice. This course relates to the environment, as environmental forensic case studies are used as examples, whereby scientific methods are applied towards environmental crimes.

WGSS	240	Sexualities Studies	Women's, Gender / Sexuality St	1	This course considers the significance of the field of sexuality studies emergent in the U.S., and the relationship of sexuality, something commonly thought of as intimate, to the realm of the institutional, discursive, and policy. This course relates to the environment, as students learn about the general perception that our environment has on topics of sex, gender, and sexuality/desire.
CHIN	312	Advanced Chinese I	World Languages and Cultures	1	This course relates to the environment through the use of books and materials that are sustainability related.
CHIN	25	Advanced Chinese II	World Languages and Cultures	1	This course relates to the environment through the use of books and materials that are sustainability related.
CHIN	25	Chinese, Elementary II	World Languages and Cultures	1	This course relates to the environment through the use of books and materials that are sustainability related.
CHIN	212	Chinese, Intermediate I	World Languages and Cultures	1	This course relates to the environment through the use of books and materials that are sustainability related.
SPAN	25	Spanish, Elementary I	World Languages and Cultures	1	This course relates to the environment through the use of books and materials that are sustainability related.
SPAN	252	Spanish, Intermediate I	World Languages and Cultures	1	This course focuses on the environment in regards to the environmental issues and policies that are implemented within spanish speaking countries.
SPAN	25	Spanish, Intermediate II	World Languages and Cultures	1	This course focuses on the environment in regards to the environmental issues and policies that are implemented within spanish speaking countries.
CHIN	25	Chinese, Elementary II	World Languages and Cultures	1	This course relates to the environment through the use of books and materials that are sustainability related.
SPAN	355	Creative Writing in Spanish	World Languages and Cultures	1	This course relates to the environment through the use of books and materials that are sustainability related.
SPAN	357	Intro to Latin American Lit	World Languages and Cultures	1	Students are able to explore their creativity and apply their spanish writing skills through creating writing. The course relates to the environment, as the topics for the works of writing pertain to the cultural, environmental, and political state in Latin America.
FREN	490	L'environnement Autour Le Mond	World Languages and Cultures	1	This course relates to the environment through the use of books and materials that are sustainability related.
WSEM	496	The Int'l Politics of Water	WSM Washington Semester	1	The topic varies by section; however, this particular course explores the international politics of water. The course relates to the environment, as it delves into how politics internationally is affected by the availability of water.
WSEM	120	Mentored Field Practicum	WSM Washington Semester	1	This course grants students the opportunity to intern for an organization of their choice, as their professor helps them along the way, serving as a mentor. The purpose of this course is to help students gain the skills, experience, and contacts necessary to maximize their education and knowledge of D.C. This course is sustainability focused, as many of the internships that students pursue are for environmental organizations.
WSEM	400	Washington Summer Intern/Sem	WSM Washington Semester	1	The Washington Summer Internship Program is designed to provide on-the-job training for college students from across the country in their respective fields of interest. The internships that students pursue are often sustainability-focused.
WSEM	120	Mentored Field Practicum	WSM Washington Semester	1	This course grants students the opportunity to intern for an organization of their choice, as their professor helps them along the way, serving as a mentor. The purpose of this course is to help students gain the skills, experience, and contacts necessary to maximize their education and knowledge of D.C. This course is sustainability focused, as many of the internships that students pursue are for environmental organizations.

WSEM	496	Write Well and Get Published	WSM Washington Semester		1	This course is designed to teach students the fundamentals of journalistic writing in a variety of forms- features, personal essays, blogs, opinion pieces, as well as how to market stories to print and online publications. This course is focused on sustainability, as the pieces that students pursue are often sustainability focused.
WSEM	120	Mentored Field Practicum	WSM Washington Semester		1	This course grants students the opportunity to intern for an organization of their choice, as their professor helps them along the way, serving as a mentor. The purpose of this course is to help students gain the skills, experience, and contacts necessary to maximize their education and knowledge of D.C. This course is sustainability focused, as many of the internships that students pursue are for environmental organizations.
WSEM	496	Sustainable Devel Res Project	WSM Washington Semester		1	This course focuses on the environment, as students receive the knowledge and tools to manage sustainability development issues and bridge the gaps between divides in environmental policy and goals.
WSEM	496	Sustainable Devel Seminar I	WSM Washington Semester		1	This seminar teaches students about the key actors in the global community, inequity, the Sustainable Development Goals, social entrepreneurship, and conservation and climate change.
WSEM	496	Sustainable Devel Seminar II	WSM Washington Semester		1	This seminar teaches students about the key actors in the global community, inequity, the Sustainable Development Goals, social entrepreneurship, and conservation and climate change.
WSEM	496	Sustainable Develop Seminar I	WSM Washington Semester		1	This seminar teaches students about the key actors in the global community, inequity, the Sustainable Development Goals, social entrepreneurship, and conservation and climate change.
WSEM	496	Sustainable Develop Seminar II	WSM Washington Semester		1	This seminar teaches students about the key actors in the global community, inequity, the Sustainable Development Goals, social entrepreneurship, and conservation and climate change.
WSEM	490	Washington Sem Ind Study Proj	WSM Washington Semester		1	This project allows students to branch out individually and explore issues within development towards sustainability. Students work towards bridging gaps within environmental policy.
WSEM	120	Mentored Field Practicum	WSM Washington Semester		1	This course grants students the opportunity to intern for an organization of their choice, as their professor helps them along the way, serving as a mentor. The purpose of this course is to help students gain the skills, experience, and contacts necessary to maximize their education and knowledge of D.C. This course is sustainability focused, as many of the internships that students pursue are for environmental organizations.

## GRADUATE

Dept.	#	COURSE TITLE	DEPARTMENT	R	F	Description
ANTH	640	Anthropology of Conservation	Anthropology		1	Topics vary by section; however, this particular course explores the connections between biology, environmental and social studies. Students learn about the natural environment and evolution.
ANTH	696	Soc Cont of Bilingual Learners	Anthropology		1	The topic varies by section; however, this particular course explores how social factors and language policy influence the educational success of bilingual learners, considering the role of multilingualism and linguistic minorities in society. Students learn how to mitigate the impact of societal factors on the educational success of bilingual learners. This course relates to the environment, as it delves into how an educational environment can impact bilingual learners.

ANTH	640	Climate Justice	Anthropology		1	The topic varies by section; however, this particular course explores environmental policy debates, as well as the national outlook on environmental development. Students will examine climate issues and develop a new approach around these issues.
COMM	517	Hist of Cross-Cultural Cinema	Communication, School of		1	This course explores the cross-cultural analysis of film and video, drawing on examples from Asia, Latin America, Africa, and the Middle East. This course relates to the environment, as it touches on many different environments in regards to their cultural and ethnic identity.
COMM	711	Teaching Seminar in Comm	Communication, School of		1	This course provides students with an overview of teaching philosophies, course management issues, curriculum issues in communication, academic culture, and related institutions significant to the teaching of communication. This course relates to the environment in regards to the classroom environment.
COMM	631	Film/Video Prod & Direction I	Communication, School of		1	This course provides students with the fundamental technical and aesthetic considerations involved in visual media production. This course relates to the environment through the use of examples. Environmental documentaries are used as a way to teach students about formatting and cinematography.
COMM	634	Film/Video Prod & Direction II	Communication, School of		1	This course emphasizes planning, treatment and shot scripting, development of scene and character, location lighting, refinements of continuity, location sound recording, and visual design. This course relates to the environment through the use of examples. Environmental documentaries are used as a way to teach students about formatting and cinematography.
COMM	568	Environ Filmmaking for Pub TV	Communication, School of		1	This course provides students with hands-on experience through writing, producing, shooting, and editing a 30-minute program for Maryland Public TV and other PBS stations around the Chesapeake Bay. This course relates to the environment, as students are assigned to produce a segment focused on their environment and sustainability.
COMM	560	Backpack Documentary	Communication, School of		1	This course reflects the transformation in visual storytelling made possible by technological advances. This course relates to the environment through the use of examples. Environmental documentaries are used as a way to teach students about formatting and cinematography.
COMM	502	In-Depth Journalism	Communication, School of		1	This course provides students with the tools to dig deeper into journalism, whether it be policy, politics, Washington or technology. This course relates to the environment, as it delves into topics concerning the environment.
COMM	640	Principles of Strategic Comm	Communication, School of		1	This course examines the strategic elements of public communication strategies with focus on communication campaigns, public opinion, the media, the role of research, audience identification, message development, and communicating to various publics. This course relates to the environment, as students must explore the role of the environment in regards to society, politics, culture, and business as it relates to the ethics of persuasion.
COMM	524	Prod Environ & Wildlife Films	Communication, School of		1	This course focuses on the art of producing films: being creative, selecting and researching issues, writing a film treatment, telling effective and fascinating stories, finding compelling characters, pitching powerfully, speaking effectively in public, marketing, distributing, conducting outreach, raising money, thinking ethically, and working with NGOs. This course relates to the environment through the use of examples. Environmental documentaries are used as a way to teach students about formatting and cinematography.

COMM	646	Strategic Communication Pract	Communication, School of		1	This course applies the principles and skills from other strategic public communication courses to practical case study experiences. This course is focused on the environment, as some of the case studies used pertain to sustainability.
ECON	690	Analysis of Vulnerability	Economics		1	This course falls under the independent study project in economics. This course relates to the environment through the use of sustainability related case studies and examples that pertain to the environment in relation to cultural and societal vulnerability.
ECON	662	Development Microeconomics	Economics		1	This course examines the meaning and measures of economic development. Students explore issues at micro and meso levels, such as poverty traps, coordination failures, credit and labor market imperfections, health, gender, and population. This course relates to the environment in regards to the environmental roadblocks that stall or inhibit economic development.
ECON	674	Gender Persp Econ Anlys: Micro	Economics		1	This course explores the gender dimensions of economic life drawn from a body of studies and research on gender-aware analyses in microeconomics, labor, poverty, and social policy. This course relates to the environment, as it shows how the economy, gender inequality, and poverty are all social policy issues that derive from our environment.
ECON	600	Microeconomics	Economics		1	This course explores the theory of demand, production, and distribution, as well as market structure and performance. This course relates to the environment, as it pertains to the environment's economic success.
ECON	663	Development Macroeconomics	Economics		1	This course analyzes the role of macroeconomics within developing countries, including discussion of growth models, open-economy macroeconomics, exchange rates, monetary policy, fiscal policy, international trade, and related topics. The objective is to understand the rationale for and the effectiveness of different macroeconomic policies in a developing country setting. This course relates to the environment in regards to how the policy will impact the environment of a developing country.
ECON	661	Survey of Economic Development	Economics		1	This course introduces topics, such as poverty, inequality, gender, growth, trade, finance, employment, debt, exchange rates, and macro policies in developing countries. This course relates to the environment, as it focuses on how economic development at both the micro and macro levels impact the environment within developing countries.
ECON	624	Applied Econometrics II	Economics		1	This course introduces topics of econometrics, including time-series techniques, limited dependent variable models, simultaneous equations, instrumental variables, and panel data methods. This course relates to the environment, as it delves into economic policy that affect an environment.
ECON	680	Economics MA Capstone Seminar	Economics		1	This course examines research methods, the writing of economics, and the presentation of research. This course relates to the environment, as it draws on the impact that economic policy has on an environment and its citizens.
ENVS	505	Energy	Environmental Science		1	This course provides a general overview of sources of energy utilization with a focus on the relevant physical concepts, quantification and an emphasis on sustainability.
ENVS	572	Applied Conservation Science	Environmental Science		1	The topic varies by section; however, this particular course explores ...
ENVS	500	Ecohydrology	Environmental Science		1	This course examines how hydrological processes at macro and watershed scales influence aquatic ecology. The emphasis of this course is on freshwater and estuarine systems. This course relates to the environment through the exploration of water and water systems within the environment.

ENVS	681	Environmental Practicum	Environmental Science	1	Students design and implement a research intensive project with the goal of producing a manuscript for a peer-reviewed publication. This course is sustainability focused, as students have chosen to pursue research on environmental/sustainable developments.
ENVS	690	Hydrology of Meadowood SRMA	Environmental Science	1	This course falls under the independent study project in environmental science. Students choose a topic of their choice that relates to the environment.
ENVS	596	Ngss Standard Beyond Classroom	Environmental Science	1	The topic varies by section; however, this particular course
ENVS	690	Environmental Science Research	Environmental Science	1	This course falls under the independent study project in environmental science. This course relates to the environment through sustainability focused topics, such as energy and waste, diversity, and food and agriculture.
ENVS	690	Nutr. Analy. DC Green Roofs	Environmental Science	1	This course introduces the benefits of green roofs, known to reduce energy use in buildings and catch stormwater runoff.
ENVS	690	Nutrient Pollution Mitigation	Environmental Science	1	This course falls under the independent study project in environmental science. This course focuses on the environment, as it explores nutrient pollution policy and data.
ENVS	696	Clim Chnge/Ocean Acidification	Environmental Science	1	The topic varies by section; however, this particular course focuses on the acidification of oceans as a result of carbon dioxide emissions.
ENVS	581	Environmental Science II	Environmental Science	1	This course delves into the environmental interactions through the formulation and analysis of simple mathematical models enabling exploration of the consequences of a variety of assumptions and conditions.
ENVS	690	Sustainable Waste Mgmt- Brazil	Environmental Science	1	The topic varies by section; however, this particular course expands on Sustainable Waste Management and its importance in tending to environmental issues within Brazil.
HPRM	620	Critical Issues	Health / Fitness	1	This course examines current literature on physical fitness, coronary risk factors, nutrition, smoking, and other issues related to health and fitness. This course relates to sustainability, as it focuses on how our environment shapes our health behavior or lack there of.
HPRM	575	Global Health	Health / Fitness	1	This course examines health issues around the globe such as disease rates, maternal and child health, violence, nutrition, and health care systems. This course focuses on the environment in relation to how the environment affects a population's health globally.
HPRM	618	Strategic Plan in Health Promo	Health / Fitness	1	This course provides exposure to the management concepts and requirements of planning and developing health promotion programs. This course relates to the environment, as a community's environment affects their health outcome. Students work to develop programs that will combat unhealthy habits and replace them with healthy habits.
HFIT	650	Behavior Change in Health Prom	Health / Fitness	1	This course provides students with an overview of the theory and application for assisting individuals and groups change lifestyle behaviors related to health promotion. Students work to combat unhealthy behaviors, such as smoking, obesity, stress, or diet for the reduction of chronic disease risk. This course relates to the environment, as students draw connections between an environment and individuals' ability to make healthy decisions.
SIS	793	U.S.Pol Arab Transtn Countries	International Service, School	1	The topic varies by section; however, this particular course is aimed to research, analyze, and recommend a new strategic policy path for the U.S. in Arab transition countries. This course relates to the environment, as it covers the rural development within these Middle Eastern transition countries.

SIS	793	Climate Ethics & Env Justice	International Service, School	1	The topic varies by section; however, this particular course explores initiatives on climate change, human rights, and equity.
SIS	793	Growth & Dev in the Carribean	International Service, School	1	The topic varies by section; however, this particular course focuses on the economy, labor market, government policy, and legal environment within the Caribbean. This course relates to the environment in regards students' exploration of the Caribbean legal and governmental environments.
SIS	795	Climate Risk and Activism	International Service, School	1	This course falls under the graduate research requirement. This specific topic focuses on environmental policy, as well as the national outlook on environmental development. Students wil examine climate issues and develop a new approach around these issues.
SIS	603	Brazil: Rural Development	International Service, School	1	The topic varies by section; however, this particular course focuses on rural development theories and practice through agrarian livelihoods and food systems in Brazil. This course focuses on the environment in regards to the agricultural exploration and development within Brazil.
SIS	797	CARTOGRAPHY AND URBAN POLICY	International Service, School	1	This course falls under the master's thesis supervision. This course uncovers the history, theory, and innovation behind urban cartography. This course relates to the environment, as cartography itself presents us with an image our everchanging environment.
SIS	690	Climate Change & Brazil Agr	International Service, School	1	This course falls under the independent study project in international studies. Students explore rural development theories and practice through agrarian livelihoods and climate change in Brazil. This course focuses on the environment in regards to the agricultural exploration and development within Brazil.
SIS	637	International Development	International Service, School	1	This course tackles the problems of the "change-agent" in working for development and examines the major development issues. This course relates to the environment, as agricultural development and the food system are explored in relation to the problems with development.
SIS	649	Environment and Development	International Service, School	1	This course focuses on debates concerning various human-made or development-related root causes of natural-resource degradation in the Third World. Students look critically at innovative policy responses, which attempt to link the environment and development. This course is sustainability focused, as a large portion of the curriculum explores the relationship between the environment and development.
SIS	650	Global Econ & Sustainable Dev	International Service, School	1	This course provides students with a glimpse into the political economy of development. Students delve into the evolution of global economic activity and draw connections between global economic interactions and sustainable development.
SIS	620	Intro to Environmental Econ	International Service, School	1	The topic varies by section, with topics rotating from water, food and agriculture, climate and energy, policy analysis, sustainable design, comparative environmental politics, and environmental security whereby all topics focus on the environment.
SIS	635	Introduction to Global Health	International Service, School	1	The topic varies by section, with topics rotating from rural development, managing economic and political reform, etc. These courses relate to the environment, as both rural development and economic and political reform focus issues of sustainability through social learning, action research, institutional development, and social development management.

SIS	636	Micropolitics of Development	International Service, School	1	This course introduces social categories that affect politics and development, such as class, status, ethnicity, caste, gender, and differences based on culture and religion. The course provides an opportunity for students to observe a number of case studies. The course relates to the environment, as the case studies are sustainability related.
SIS	795	Climate Change-Migration Nexus	International Service, School	1	The course focuses on the threats posed by climate change and human migration. This course is sustainability focused, as it introduces the topic of climatology and sustainability initiatives.
SIS	795	Comm Based Nat Res Mgmt Botswa	International Service, School	1	This course delves into natural resource management, focused on the environment through the exploration of conservation, climate change, and renewable energy.
SIS	795	Deconstructing Fishery Models	International Service, School	1	Exploring fisheries and fishery models, this course focuses on the environment, delving into the environmental impact of fisheries.
SIS	619	Environmental Peacebuilding	International Service, School	1	Environmental peacebuilding integrates natural resource management in conflict prevention, mitigation, resolution, and recovery to build resilience in communities affected by conflict. - See more at: <a href="http://environmentalpeacebuilding.org/#sthash.f2FRpCjP.dpuf">http://environmentalpeacebuilding.org/#sthash.f2FRpCjP.dpuf</a>
SIS	690	Monitoring and Evaluation WAP	International Service, School	1	This course falls under the independent study project in international studies. This course expands on the monitoring and evaluating of wireless application protocol (WAP). This course focuses on the environment, as it relates to the wireless application environment produced by WAP.
SIS	797	Politic Fallout Nat. Disaster	International Service, School	1	This course examines the political fallout of natural disasters, and its effects on voting. This course relates to the environment regarding the impact of natural disasters.
SIS	620	Water Governance	International Service, School	1	The topic varies by section, with topics rotating from water, food and agriculture, climate and energy, policy analysis, sustainable design, comparative environmental politics, and environmental security whereby all topics focus on the environment.
SIS	628	Global Health, Culture, & Comm	International Service, School	1	The topic varies by section, with topics rotating from cross-cultural collaboration in global virtual teams, health and culture across borders, public diplomacy, social entrepreneurship, global innovation without frontiers, social media and cultural-political transformation, race, class, and power in international education, field research in health communication, foreign media and public opinion, managing international and intercultural programs and exchanges, health communication, disability policy and organization, cyber-conflict in global perspective, and mass media and terrorism. This course relates to the environment as some of the topics within the course, such as health and culture across borders pertain to the environment.
SIS	690	Est. Center /Entrepreneuership	International Service, School	1	This course falls under the independent study project in international studies.
SIS	637	International Development	International Service, School	1	This course tackles the problems of the "change-agent" in working for development and examines the major development issues. This course relates to the environment, as agricultural development and the food system are explored in relation to the problems with development.
SIS	636	Micropolitics of Development	International Service, School	1	This course introduces social categories that affect politics and development, such as class, status, ethnicity, caste, gender, and differences based on culture and religion. The course provides an opportunity for students to observe a number of case studies. The course relates to the environment, as the case studies are sustainability related.

SIS	797	Another Brics Against the Wall	International Service, School	1	This course examines Brazil, Russia, India, China, and South Africa (BRICS) and their development. This course relates to the environment, as students evaluate these countries environmental welfare.
SIS	635	Urban Development	International Service, School	1	The topic varies by section; however, this particular course focuses on how to make cities function better. Students review literature on the origins and growth of cities and identify contrasting views as to the role of cities in national development. This course focuses on the environment, as it covers the planning of affordable water and sanitation systems, in addition to urban environmental management with a focus on waste management, air pollution, and innovative transport planning.
SISG	768	Foundation in Economic Dev	International Service, School	1	The topic varies by section, with topics rotating from theories and concepts in the politics of global development, global politics of the environment, and analysis of global and international health politics. This course relates to the environment in regards to its exploration of global politics of the environment.
SISG	768	Politics of Global Development	International Service, School	1	The topic varies by section, with topics rotating from theories and concepts in the politics of global development, global politics of the environment, and analysis of global and international health politics. This course relates to the environment in regards to its exploration of global politics of the environment.
SIS	635	Social Accountability	International Service, School	1	The topics vary by section, with topics rotating from rural development, managing economic and political reform, etc. This course focuses on the environment in regards to its exploration of rural development.
SIS	619	Human Rights and Conflict	International Service, School	1	The topic varies by section, with topics rotating from international economic policy coordination, emerging capital markets, international environmental policy, political risk analysis, international relations of Japan, preventive diplomacy, United States and Cuba, and nonviolence. This course relates to the environment, as one of the topics within the course explores international environmental policy.
SIS	619	Conflict and Development	International Service, School	1	The topic varies by section, with topics rotating from international economic policy coordination, emerging capital markets, international environmental policy, political risk analysis, international relations of Japan, preventive diplomacy, United States and Cuba, and nonviolence. This course relates to the environment in regards to the national and international policy and market environments that are discussed.
SIS	653	Bioterror in the 21st Century	International Service, School	1	The topic varies by section, with topics rotating from substantive national security issues such as terrorism, non-proliferation, intelligence, and defense policies, as well as U.S. foreign policy toward specific regions or countries. This course focuses on the environment, as most of the topics focus on security issues and policy implemented in response to the threat of terrorism within the environment in the U.S.
SIS	653	Technology & National Security	International Service, School	1	The topic varies by section, with topics rotating from substantive national security issues such as terrorism, non-proliferation, intelligence, and defense policies, as well as U.S. foreign policy toward specific regions or countries. This course focuses on the environment, as it explores national security as a response to the environmental threat of terrorism within the U.S.
SIS	690	Farm Bill Title Prgrm Analysis	International Service, School	1	This course focuses on the Agricultural Act of 2014 and analysis of implications in agriculture and conservation.
SIS	620	Political Ecology of Food & Ag	International Service, School	1	The topic varies by section, with topics rotating from water, food and agriculture, climate and energy, policy analysis, sustainable design, comparative environmental politics, and environmental security whereby all topics focus on the environment.

SIS	793	U.S. Food/Farm Bill Reform	International Service, School		1	This course reviews significant environmental legislation, such as the Farm Bill and its components. This course focuses on the environment, as it delves into environmental topics, such as conservation and energy, agriculture, and rural development.
SIS	619	Localizing Peace	International Service, School		1	This course addresses the need to make use of local peace resources and to pursue forms of local-international collaboration that sustainably yield locally valid and effective solution. This course relates to the environment in regards to its emphasis on sustainable development.
SIS	607	Peace Paradigms	International Service, School		1	This course provides an overview of the history and development of five approaches to peace, which students analyze and compare: peace through force, through world order, through communication and conflict resolution, through nonviolence, and through transformation. This course relates to the environment through the cultural and environmental approaches to peace.
SIS	655	Asia Comp Persp: Gov, Dev, Sec	International Service, School		1	The topic varies by section, with topics rotating from themes in comparative and regional studies including politics, economy, identity, regional security, civil society, governance, foreign policy, democratization, and globalization in Asian and Southeast Asian countries. This course relates to the environment in regards to the exploration of globalization, which is burdensome for the environment.
SIS	795	Impact of Migrant Labor	International Service, School		1	This course falls under the master's research requirement. This course evaluates the impact that migrant workers have on the labor market, which varies depending on the skills and services that they provide. This course relates to the environment, as it follows the environmental changes that occur as a result of migrant workers.
SIS	603	Malaysia/Indonesia: Globaliz	International Service, School		1	The topic varies by section; however, this particular course explores globalization within Malaysia and Indonesia. This course relates to the environment, as it delves into the ways in which these nations hold with environmental and political forces.
SIS	795	Migrant Labor & Refugees	International Service, School		1	Independent study looking at impact of environmental change on migrant labor.
SIS	676	SE Asia, US & Regional Powers	International Service, School		1	The topic varies by section; however, this particular course examines the roles and impact of the U.S., Japan and China, and other regional powers on the transformation of security and economic frameworks in East and Southeast Asia from the end of the Second World War to the present. This course relates to the environment, as it touches on environmental degradation and natural disasters.
SIS	795	SE ASIA, US & SOUTH CHINA SEA	International Service, School		1	This course explores the U.S.-China relations and examines the politics and foreign policies of the two. This course relates to the environment, as it touches on topics such as environmental policy.
SIS	620	Global Climate Change	International Service, School		1	The topic varies by section, with topics rotating from water, food and agriculture, climate and energy, policy analysis, sustainable design, comparative environmental politics, and environmental security whereby all topics focus on the environment.
SIS	635	Development Management	International Service, School		1	The topic varies by section, with topics rotating from rural development, managing economic and political reform, etc. These courses relate to the environment, as both rural development and economic and political reform focus issues of sustainability through social learning, action research, institutional development, and social development management.
SIS	730	Green Recov & Recon Training	International Service, School		1	The topic varies by section; however, this particular course

SIS	730	Rapid Environ Impact Assessmnt	International Service, School		1	This course explores the Rapid Environmental Impact Assessment, with the purpose of identifying potential environmental problems or risk factors. This course is focused on the environment, as it identifies issues, offers solutions, and promotes awareness to better our environment.
SIS	620	Sustainable Dsg/LEED Training	International Service, School		1	The topic varies by section; however, this particular course introduces students to the components that play a role in planning, constructing, maintaining, and operating sustainable buildings through the use of Leadership in Energy and Environmental Design (LEED).
SIS	619	Corp Soc Respons in Glbl Cntxt	International Service, School		1	The topic varies by section, with topics rotating from international economic policy coordination, emerging capital markets, international environmental policy, political risk analysis, international relations of Japan, preventive diplomacy, United States and Cuba, and nonviolence. This course focuses on the environment, as it touches on international environmental policy.
SIS	795	By Any Other Name	International Service, School	1		This course falls under the master's research requirement.
SIS	660	Environment and Politics	International Service, School		1	This course provides students with an introduction to environmental politics and policy, with emphasis on the international, transnational and global dimensions. This course is sustainability focused, as students are introduced to conceptual frameworks, issue areas, and analytic approaches to the field of sustainability.
SIS	797	Pig Production in Costa Rica	International Service, School		1	This course falls under the master's thesis supervision.
SIS	620	Post Carbon World	International Service, School		1	The topic varies by section, with topics rotating from water, food and agriculture, climate and energy, policy analysis, sustainable design, comparative environmental politics, and environmental security whereby all topics focus on the environment.
SIS	619	Seminar in Int'l Affairs	International Service, School	1		The topic varies by section, with topics rotating from international economic policy coordination, emerging capital markets, international environmental policy, political risk analysis, international relations of Japan, preventive diplomacy, United States and Cuba, and nonviolence. This course relates to the environment in regards to the national and international policy and market environments that are discussed.
SIS	620	Urban Political Ecology	International Service, School	1		The topic varies by section, with topics rotating from water, food and agriculture, climate and energy, policy analysis, sustainable design, comparative environmental politics, and environmental security whereby all topics focus on the environment.
SIS	750	Program Evaluation	International Service, School	1		The topic varies by section, covering methods used in the field of international affairs, including policy analysis, program evaluation, qualitative methods, and advanced quantitative methods. This course relates to the environment in regards to the case studies pertaining to environmental policy.
SIS	635	Pop, Migration & Devel	International Service, School		1	The topic varies by section, with topics rotating from rural development, managing economic and political reform, etc. These courses focus on the environment, as both rural development and economic and political reform explore and tackle sustainability initiatives.
SIS	648	Women and Development	International Service, School		1	This course explores the diverse socioeconomic, cultural, religious and political factors that affect women including the impact of development itself. This course is focused on the environment, as it delves into how women are impacted by their environment.
SIS	602	AU-Univ for Peace Exchange	International Service, School		1	The topic varies by section; the course constitutes key elements in American University-University for Peace, Costa Rica exchange program.

SIS	660	Environment and Politics	International Service, School		1	This course provides students with an introduction to environmental politics and policy, with emphasis on the international, transnational and global dimensions.
SIS	792	Practice of Int'l Relations	International Service, School		1	This course helps students in integrating classroom learning about political, economic, and social issues of a specific country into their experience outside the classroom. This course focuses on the environment, as it challenges students to become more aware of the political, economic, and social issues within different environments.
SIS	795	Sacred Lakes and Conservation	International Service, School		1	The topic varies by section; however, this particular course
SIS	635	Soc Enterprise: Context/Pract	International Service, School		1	This course teaches graduate students about corporate social responsibility, effective activism, leadership, NGO management and social entrepreneurship. Students become comfortable with the corporate environment.
SISG	768	Sust Dev & Global Envir Policy	International Service, School		1	This course provides students with the knowledge and skills necessary for managing eco-development issues and tackling Sustainable Development.
SIS	620	The Future of Environmentalism	International Service, School		1	The topic varies by section, with topics rotating from water, food and agriculture, climate and energy, policy analysis, sustainable design, comparative environmental politics, and environmental security whereby all topics focus on the environment.
SIS	620	Intro to Environmental Econ	International Service, School		1	The topic varies by section, with topics rotating from water, food and agriculture, climate and energy, policy analysis, sustainable design, comparative environmental politics, and environmental security whereby all topics focus on the environment.
SIS	658	Financial Issues in Latin Amer	International Service, School		1	This course analyzes the fundamental and precipitating causes of these financial crises, focusing on economic policy and institutional shortcomings, as well as on other domestic and external forces that generate financial instability. This course relates to the environment, as it delves into the policy environment in Latin America.
KSB	653	Business Leadership Skills	Kogod School of Business		1	This course introduces students to applied business leadership and skills through interaction with the Washington DC area business community. This course relates to the environment, as it introduces students to the business environment within Washington DC and prepares them to pursue a career in business in the future.
KSB	612	Strat Thinking for Decisions	Kogod School of Business		1	This course encourages students to think strategically about the skills provided by the functional-level courses and how those functions, as well as industry and macroenvironmental forces contribute to company success. This course relates to the environment through environment related case studies.
FIN	690	Risk Factors: Returns on Bonds	Kogod: Finance / Real Estate		1	This course falls under an internship in finance and introduces students to the risk factors with returns on bonds, such as risk of inflation, interest rate risk, and credit risk. This course relates to the environment with regard to the financial environment.
REAL	734	Real Estate Development	Kogod: Finance / Real Estate		1	This course examines real estate development, including the pricing and assembly of land and focusing on carrying out a real estate development project. This course relates to the environment, as it focuses on the environmental factors that go into real estate development, such as the purchasing of land.

FIN	630	Finan Analysis: Concepts/Apps	Kogod: Finance / Real Estate	1	This course presents finance and accounting concepts as management tools. Students learn about financial theory and techniques involving time value of money, valuation, and risk management and students develop an understanding of a firm's investment decisions and financing practices. This course relates to the environment, as students gain an understanding of the investment culture/environment and how to apply these skills in the real world.
FIN	576	Student-Managed Investmnt Fund	Kogod: Finance / Real Estate	1	This course is a collaborative class that provides valuable, real-time experiential learning in securities analysis and portfolio management. This course relates to the environment in terms of students' exploration of equity markets environment and economics.
ITEC	610	Applied Managerial Statistics	Kogod: Info Technology	1	This course allows students to use real-world data sets and PC-based software to describe sets of measurements, construct probability distributions, estimate numerical descriptive measures, and build multiple regression models. This course relates to the environment in regards to the sustainability related case studies.
IBUS	690	Global Consultancy Project	Kogod: International Business	1	This course falls under the independent study project in business.
IBUS	687	Global Project Experience	Kogod: International Business	1	This course provides students with a deeper understanding of global business through preparation and delivery of an applied project with a global client by participating in workshops and traveling to the client site. This course relates to the environment, as it prepares students to identify and scope out an environment and construct a business strategy targeting the needs and wants of that environment.
IBUS	690	Kogod Global Projects	Kogod: International Business	1	This course falls under the business independent study project. This course requires students to explore a different culture and environment and create a business plan to market to that environment at large. Students are expected to delve into environmental factors of a country of their choosing and implement appropriate business and delivery practices.
IBUS	618	Manager in International Econ	Kogod: International Business	1	This course delves into the practices and principles involved in conducting the functional aspects of business. This course relates to the environment, as it encompasses factors of nature, scope, and trends of international business as well as the international monetary system, international agreements, and considerations resulting from the environmental differences between nation.
IBUS	550	Microfin & Global Business Dev	Kogod: International Business	1	This course provides students with an introduction of the microfinance field. This course focuses on the environment, as it includes case studies that are sustainability related and focuses on the financial environment and the impact of microfinance services.
IBUS	745	Global Supply Chain Mgmt	Kogod: International Business	1	This course introduces a set of approaches designed to efficiently integrate suppliers, manufacturers, warehouses, and stores so that merchandise is produced and distributed at the right quantities, the right locations, and the right time in order to minimize costs while satisfying service level requirements. This course relates to the environment, as it requires students to scope out and reinforce an effective supply chain management approach in global and domestic organizations.

IBUS	618	Manager in International Econ	Kogod: International Business	1	This course delves into the practices and principles involved in conducting the functional aspects of business. This course relates to the environment, as it encompasses factors of nature, scope, and trends of international business as well as the international monetary system, international agreements, and considerations resulting from the environmental differences between nation.
MGMT	596	Water, Power, and Enterprise	Kogod: Management	1	The topic varies by section; however, this particular course focuses on the environment, as it provides intel on energy and power.
MGMT	690	Sust Redev of Washington, Va	Kogod: Management	1	This course provides insight into the sustainable development issues that are prevalent in the Washington D.C./VA area and the strides being done to improve the issues, such as community organizing, education in the developing world, wildlife preservation coral reefs, women's rights, energy policy, and climate change innovation.
MGMT	690	Perth Green Space Initiatives	Kogod: Management	1	As part of the Sustainability Management program, this course focuses on community green space.
MGMT	796	Sustainability Strat Capstone	Kogod: Management	1	This capstone directly focuses on sustainability, as the capstone delves into sustainability strategy.
MGMT	596	Managing For Climate Change	Kogod: Management	1	This course covers the topics that prepare sustainability executives, sustainability consultants, and sustainability employee green team members to reduce a large organization's carbon footprint, including greenhouse gas inventories, climate planning, conservation and efficiency, onsite and commercial scale renewable energy, carbon offsets, and climate reporting. This course focuses on the environment, as it delves into many environmentally focused topics that promote environmental welfare.
MGMT	596	Sustainable Prod/Purchasing	Kogod: Management	1	This course introduces sustainable purchasing, in ways that advance social responsibility and environmental sustainability by using, maintaining, disposing or re-purposing, goods and services which improve energy, water, and material efficiency; utilize renewable energy production; eliminate waste; and enhance physical employees to adopt sustainability practices.
MGMT	635	Ethics, Social Respon & Govern	Kogod: Management	1	This course focuses on understanding and articulating standards of good behavior and on developing policies and procedures to assure that standards are met. This course relates to the environment, as it teaches students about organizational leadership through their environments, including ethics, social responsibility, and governance.
MKTG	551	Marketing for Social Change	Kogod: Marketing	1	This course develops the knowledge, skills, and perspectives to apply fundamental marketing concepts to create beneficial changes in society. This course relates to the environment, as it involves working in or with environmental organizations to promote social change.
MKTG	612	Marketing Management	Kogod: Marketing	1	This course provides students with an introduction to current marketing management techniques and the tools necessary for effective marketing decision making. This course relates to the environment in regards to the environmental marketing strategy discussed.
MATH	550	Complex Analysis	Mathematics / Statistics	1	This course delves into complex functions, Cauchy's theorem and integral formulae, Taylor and Laurent series, residue calculus and contour integration, and conformal mapping. This course relates to the environment, as sustainability related examples are used.

MATH	601	Harmonic Analysis	Mathematics / Statistics	1	This course consists of periodic functions, Fourier series, Fourier transform and spherical harmonics. The course includes a brief account of the necessary ingredients from the theory of the Lebesgue integral. This course relates to the environment, as it incorporates sustainability related examples.
PHIL	690	Critical Environmental Theory	Philosophy / Religion	1	This course falls under the independent study project in philosophy. This course is focused on the environment, as it explores environmental theory.
PHIL	693	Global Ethics	Philosophy / Religion	1	This course discusses ethics, ethical systems, and the presuppositions of international relations from a critical, cross-cultural perspective. This course relates to the environment in regards to the environmental and cultural aspects that constitute or make up the ethical standards of a country.
PSYC	698	Directed Research	Psychology	1	This course focuses on research, relating to the environment through sustainability geared case studies.
EDU	698	Comp & Int'l Education	School of Education	1	This course provides students with an introduction to the historical context and underlying theories of comparative and international education, focusing on globalization, access, equity, equality, opportunity, and capacity building. This course relates to the environment in regards to cultural and equitable environment that international education systems strive to achieve.
EDU	690	English Proficiency in Spain	School of Education	1	This course falls under the independent study project in education. This course relates to the environment in regards to sustainability focused case studies used in class.
EDU	650	Intl Pers on Bilingual Edu Pol	School of Education	1	This course provides a survey of international bilingual educational policies and practices. Students examine bilingual education policies, models, and practices associated with successful and failed attempts at developing bilingual learners. This course relates to the environment, as it delves into the perception of bilingual learners within an educational environment.
EDU	651	Soc Cont of Bilingual Learners	School of Education	1	This course provides students with an understanding on how social factors and language policy influence the educational success of bilingual learners. This course relates to the environment, as it delves into the cultural and societal roles of multilingualism and linguistic minorities within an educational environment.
EDU	611	Social Theory and Education	School of Education	1	This course explores the social theories which have shaped educational institutions, policies, and practice globally, including modernization theory and theories of social and cultural reproduction and economic development. Contemporary educational issues are discussed, such as equity, multiculturalism, and global education. This course relates to the environment in regards to the diverse and contemporary educational environment.
EDU	525	Prin of Educ Assess/Evaluation	School of Education	1	This course provides intel on the benefits of assessing and evaluating education to better determine whether the needs of the students are met, in addition to their performance. This course relates to the environment, as sustainability related case studies are used.
EDU	696	Sec English Lnrs & Commn Core	School of Education	1	This course covers topics of Common Core, which is inclusive of earth sciences, sustainability, and life systems.
PME	502	Quan Methods Monitoring/Eval	School of Prof / Ext'd Studies	1	This course provides students with the skills to carry out quantitative data collection methods in monitoring and evaluation. Students learn quantitative data collection techniques and strategies, including questionnaire design, sampling methods and efficacy evaluation, and also how to use quantitative software. This course relates to the environment through the use of sustainability related case studies and data.

JLC	790	Mixed Methods Testing	SPA Justice, Law / Criminology	1	This course falls under the doctoral independent study in justice, law and criminology. This course examines mixed method research designs, combining qualitative and quantitative research methods to support an investigation. This course relates to the environment, as case studies and mock investigations administered in class pertain to the environment.
GOVT	689	Seminar in Applied Politics	SPA: Government	1	This course provides students with a conceptual and practical understanding of how Washington works. Students improve their skills in evaluating current policy proposals but also increase their factual knowledge of the structures, rules and processes of American politics. This course relates to the environment, as students delve into environmental policy.
PUAD	685	Env Sustainability Public Pol	SPA: Public Administration	1	The topic varies by section; however, this particular course delves into environmental sustainability within public policy.
PUAD	690	Environmental Policy Comp	SPA: Public Administration	1	This course falls under the independent study project in public administration, focusing on environmental policy.
PUAD	685	Pub Pol for Env and Energy	SPA: Public Administration	1	The topic varies by section; however, this particular course delves into public policy for the environment and energy.
PUAD	675	Org Analy & Strat AUMSOD C70	SPA: Public Administration	1	This course focuses on using organization development techniques in strategy development and implementation to move a system toward its desired future. This course relates to the environment regarding the use of sustainability related case studies.
PUAD	675	Org Analy & Strategy MSOD C69	SPA: Public Administration	1	This course focuses on using organization development techniques in strategy development and implementation to move a system toward its desired future. This course relates to the environment regarding the use of sustainability related case studies.
PUAD	612	Intro to Public Admin/Pol Proc	SPA: Public Administration	1	This course introduces students to the evolution of public administration as a profession, discipline, and career. Managerial, political, legal and constitutional, ethical, informational, and technical contexts of public administration are challenged. This course relates to the environment regarding sustainability related case studies that were used in class.
PUAD	718	Seminar in Public Management	SPA: Public Administration	1	This course covers public management and governance, including the tradition of management in the field of public administration, its evolution, and its contemporary character. This course relates to the environment regarding marketing strategies that pertain to public and network management environments.
PUAD	609	State and Local Management	SPA: Public Administration	1	The topic varies by section; however, this particular course delves into the transformation of law and public policy through the lense of state and local management. This course relates to the environment, comparing the local management environment to that of the state.
PUAD	671	Cost Benefit Analysis	SPA: Public Administration	1	This course explores the development and illustration of cost benefit analysis concepts, techniques, methods, and criteria through applications to a wide range of public policy issues such as economic development, infrastructure, social, and environmental projects. This course relates to the environment, as cost benefit analysis tools and skills are applied to environmental projects.
PUAD	602	Quant Meth for Pol Analysis II	SPA: Public Administration	1	This course applies regression analysis techniques to policy analysis. The course focuses on understanding the linear regression model as well as limitations of this model.

PUAD	614	Development Management	SPA: Public Administration	1	This course focuses on developing countries and the methods by which development projects are carried out. This course relates to the environment, as students look at the environmental state of developing countries.
PUAD	607	Econ & Politics of Pub Policy	SPA: Public Administration	1	This course applies basic normative and positive theories of public policy to specific policy areas, including social welfare and regulatory policies, including environmental policy.
PUAD	730	Proseminar in Public Policy	SPA: Public Administration	1	This course is an overview of the public policy field. It examines literature in three disciplines: neo-classical economics, political science, and public choice. This course relates to the environment, as environmental policy is touched on.
PUAD	604	Public Program Evaluation	SPA: Public Administration	1	This course introduces students to the elements of policy and program analysis. This course relates to the environment, as it uses sustainability related case studies.
PUAD	613	Global Governance & Public Pol	SPA: Public Administration	1	This course examines institutions with international scope such as the World Bank; the UN system and international NGOs; and policy issues with cross-national dimensions such as climate, change, trade, and human rights. This course relates to sustainability, as it delves into the issue of climate change.
PUAD	685	Global Health Policy	SPA: Public Administration	1	The topic varies by section; however, this particular course explores the processes of systematic policy formation and analysis, and the relationship between global health policies and social and economic development. This course relates to the environment, as environmental policy is tackled.
PUAD	670	Economics for Policy Analysis	SPA: Public Administration	1	This course covers microeconomic tools for policy analysts, including resource scarcity, opportunity cost, theory of the consumer, theory of the firm, consumer, and producer surplus, and market equilibrium. This course relates to the environment, as students learn about the ins and outs of the market and business environments.
PUAD	696	Health Economics and Policy	SPA: Public Administration	1	The topic varies by section; however, this particular course examines our healthcare system through an economic lens, revealing the importance of economics on health care and policy. This course relates to the environment with regard to the environmental concerns that impact our overall health and well-being.
LAW	739D	Women&Intl Hmn Rghts Law	WCL, Washington College of Law	1	This course addresses the challenges of achieving the international legal protection of the human rights of women. It examines how international and regional human rights have been applied to prevent and punish the violations of women's rights, as well as delving into feminist theories and empirical data used to expose women's experiences of injustice. This course relates to the environment in regards to the cultural, social, and traditional environments and its perception on women.
LAW	614	Alt Dispute Resoltn	WCL, Washington College of Law	1	I teach Alternative Dispute Resolution Law and the course does address social issues to the extent that we explore the advantages and disadvantages (from a social welfare perspective) of having available in business and individual contexts alternative dispute resolution processes that are separate from public dispute resolution mechanisms (primarily court litigation). Thus, for example, we assess whether confidential ADR processes that are not open to the public (as court cases are) and whose decisions are not public or precedent-setting have a negative effect on public welfare, or not, and whether there are countervailing benefits surrounding the availability of ADR choices.

LAW	726	Devl Finance, Wrld Bnk,IFIs	WCL,Washington College of Law	1	This course focuses on International Financial Institutions, their objectives, rationales, and purposes. Students will examine multinational regional development banks. This course relates to the environment, as the class will look at issues whereby IFI operations legal matters in the issues of environmental protection.
LAW	686	Fed Pblc Lnds & Nat Resources	WCL,Washington College of Law	1	This course explores the history of public land law and delves into APA, judicial review, NEPA, and planning statutes. Students learn about the Endangered Species Act and the Oil Pollution Act. This course relates to the environment, as it delves into environmental topics such as the aforementioned, in addition to renewable energy and the wildlife resource.
LAW	795P	Agriculture & Sustainability	WCL,Washington College of Law	1	This course delves into how society produces food and its implications for public health and welfare, the environment, and animals. Students look at agricultural, environmental, and food and nutrition laws. This course focuses on the environment, as students look directly at the relationship between the food we eat daily to the environment.
LAW	725B	Gend,Cult Diff, Humn Rghts	WCL,Washington College of Law	1	This course introduces issues in international human rights law and humanitarian law, as they relate to concepts of gender and gender identity. This course relates to the environment in regards to the environmental, cultural, and traditional roles on gender in times of both conflict and stability.
LAW	817	Intl Trd Pol Theory&Practice\	WCL,Washington College of Law	1	This course examines the trade policies of major players, a discussion of trade policy instruments and their impacts on international trade law and negotiations. Students will develop an analytical view of the U.S trade policy system in comparison with systems of the European Union, Brazil, China, and other developing countries. This course relates to the environment with regards to the environmental welfare and policy of the aforementioned countries.
LAW	795TD	Trade & Diplomacy	WCL,Washington College of Law	1	This course provides students with an introduction to international trade diplomacy, discussing the trade policies of major players, how they utilize trade policy tools such as preferential trade agreements, trade preference systems, trade remedies, non-tariff barriers, negotiations and dispute settlement to achieve their goals. This course relates to the environment, as students are introduced to the international trade environment, whereby they learn about the motivations behind the policies and actions of governments regarding international trade issues.
LAW	795SD	IP & Environmental Law	WCL,Washington College of Law	1	This course explores the role of Intellectual Property (IP) in conserving or sharing the benefits of biodiversity and how IP operates to restrict or enable access to plants' genetic resources for food and agriculture. This course relates to the environment, as it establishes a connection between IP and environmental sustainability.
LAW	658	Insurance Law	WCL,Washington College of Law	1	This course provides students with an overview of insurance law. Students will examine life, accident, health, and property insurance. This course relates to the environment through the use of environmental related case studies.
LAW	681	Intl Law of Biodiversity	WCL,Washington College of Law	1	This course reviews the principles of international law for the conservation of biological diversity and wildlife. This course directly relates to sustainability, as students learn about topics such as biological diversity, ocean fisheries, migratory species, and ecosystems and wildlife trade.

LAW	795EJ	Environmental Justice	WCL, Washington College of Law		1	This course focuses on domestic environmental issues and environmental human rights. This course focuses on the environment, as students not only learn, but must prepare a 12 minute case study on a current environmental/energy conflict involving land use, community desires, redevelopment, or industrial expansion.
LAW	795HR	HmnRghts:GlobalDisabilityRght	WCL, Washington College of Law		1	This course examines the Convention on the Rights of Persons with Disabilities (CRPD) and its formulation. This course relates to the environment in terms of the perception and treatment of disabled individuals within their environment and within society.
LAW	813	Compar Env Law	WCL, Washington College of Law		1	This course presents different approaches for protecting the environment through national environmental legislation. Emphasis is given to the major components of any modern environmental legal system, including environmental impact assessment, access to environmental information, science-based environmental standards, and implementation of international agreements including Agenda 21. This course is focused on the environment, as reflected through the aforementioned environmental topics.
LAW	618	Intl Env Law	WCL, Washington College of Law		1	This course examines case studies of investigations such as global warming and sea level rise, export and import of hazardous waste, and the problem of "ghost" driftnets abandoned in the global commons of our marine environment. This course relates to the environment, as students explore these environmental issues, in addition to environmental law in the European Community, the general foundations of international law, and the relationship to human rights law and international trade law.
LAW	737	Intl Instu & Envr Protection	WCL, Washington College of Law		1	This course surveys international institutions, such as the World Bank and the United Nations Environment Programme. This course focuses on the environment, as students learn about how certain policies and activities promote or impede environmental protection and sustainable development.
LAW	899	Extshp Component	WCL, Washington College of Law		1	Students who have completed one year of law school may receive academic credit for performing substantive legal work under the supervision of an attorney in a government agency, nonprofit organization, court, or private law firm engaged in pro bono activities. This course relates to the environment, as many students choose to undertake an externship with an environmental organization.
LAW	769	Supervised Extshp Sem	WCL, Washington College of Law		1	Similar to the externship, the seminar is offered to students who have completed one year of law school and who seek an experiential program that promotes hands-on learning in the federal legislative process. This seminar relates to the environment, as students are able to explore environmental legislation.
