The Details

AU Honors

AU Honors is a rigorous, hands-on, four-year program dedicated to exploring real world issues through an interdisciplinary lens. Enrolling 25 students each year, the program offers a unique, team-taught curriculum of liberal arts courses and research projects designed to challenge students with the desire and ability to perform at the highest level. First-year AU Honors students reside in a diverse living-learning community.

AU Scholars

The AU Scholars Program is a selective, one-year living-learning community that fosters creativity, critical thinking, and problem solving through transformative research experiences and other scholarly activities.

The Community-Based Research Scholars Program

The Community-Based Research Scholars (CBRS) program is a selective, year-long living-learning community that emphasizes responsible and meaningful service learning through community-based research opportunities.

Financing Your Education

Staff from the Financial Aid Office and the Office of Student Accounts will present options available to help finance your education.

Life as an Eagle

Students only, please. Current students will answer the questions you really want to ask.

Life as an Eagle Parent

This panel of Eagle parents and campus administrators will address many of the questions parents have about campus life. You'll learn about the programs and services that support student learning and transition to life at AU as well as programs just for parents.

Learning Beyond the AU Campus

Join us for a panel discussion on the many opportunities outside of the classroom—from internships to study abroad to the chance to make a difference through community service and community engagement. You can do it all here at AU!

University College

This session will discuss University College (UC), AU's largest and oldest first-year living learning community. UC combines limitless opportunities in Washington, DC with the best elements of college life—meeting new people, residence hall living, studying with top-notch professors, and finding your passion. Whether meeting with experts, collaborating with another class, or visiting DC institutions, your Complex Problems professors and program leaders connect classroom and residential experiences to the real world. Please note, only students not already in a living-learning community may sign up for University College.
