

Caring for your Plant

- ✓ For best results, place your plant 4 – 6 feet from a sunny window and away from any draft (air conditioning and heating vents).
- ✓ The lower the light available, the less water it will need.
- ✓ Plants should be fed every third or fourth watering.
- ✓ Water the following plants thoroughly when the plant is 2/3 dry and toss the drainage:
 - Pothos Snake
 - Spider Ribbon
 - Palm Pineapple Dracena
 - Philodendron
- ✓ Water the following plants thoroughly when the top of the soil begins to feel dry and toss the drainage:
 - Prayer plant Nerve plant
 - Ivy
