Working Group Report Out: Student Life and Safety
Jacobs Field Soundwall
- ~360 feet long and 15 feet high.
- Location reduces the risk of negative impact to buffer area.
- Highly effective sound absorptive barrier technology.

- FPA filed on 9/19/2022.
- Public hearing on 1/9/2023.
Refinements to the design since 9/19/22 FPA and following the 11/16/22 field meeting with the DC Urban Forester:

- Removal of an additional overmature Leyland cypress.
- Adjustment of the exact alignment of the wall to avoid conflicts with the structural root zone of special trees.

Summary of Related Engagement with Owners of 4710 Woodway Lane:

**Required Engagement:**
- All plans and proposals have been disclosed regarding the likely impact of the barrier upon the buffer area, including contemplated mitigation measures.

**Other Engagement:**
- Active consultation and collaboration with their designated arborist representative in developing final plans.
- Meetings to discuss/review draft plans and gather feedback.
- Hard copies of plans provided to aid review.
Remaining planned refinements to the design before pre-hearing filing deadline on 12/19/22:

- Confirmation of the spacing of the posts/panels and potential select adjustments in order to provide greater support for wind loads at the middle and outer edges of the fence.

Note: No changes to the location, length, and height are currently anticipated.
