Online Teaching Assistants: Facilitating and Planning Online Classes

Learning Outcomes

- Recall and apply pedagogical best practices for online teaching.

Module Description

This module is intended for Teaching Assistants (TAs) in online courses who are responsible for the facilitation of online courses (i.e., design and/or facilitation responsibilities including full classes and discussion sections). TAs in other roles, such as those assisting with synchronous sessions, grading, office hours, etc. do not need to complete this module and should complete the module Assisting Faculty in Online Courses.

I. Watch Video: Introduction

   a. Please read pp 79-82, inclusive, which are a list of Twenty-Five Principles of Learning from Cognitive Science. The list includes research-based principles from cognitive science about how students learn best, and what the implications are for course instructors. Feel free to read further for thorough explanations of each principle.

III. Video 2: Wrap Up
IV. Reflection Questions

a. What are some instructional strategies to consider when planning an online course that maximizes student engagement?

b. Why is testing to prepare for an exam a good studying strategy? How does what we know about learning translate to our teaching strategies?
