

UNBREATHABLE

THE FIGHT FOR HEALTHY AIR

Advocacy and Activism at Work: Clean Air, Climate and Equity

AUGUST 19, 3:30-5:00 PM ET

This event will begin with a virtual screening of the new film, “Unbreathable: The Fight for Healthy Air,” which focuses on the remarkable progress made by the Clean Air Act, and the remaining obstacles to eliminating air pollution and saving lives.

Following the screening, a virtual panel of climate and healthy air activists will address their critical role in advocating for environmental justice, clean air, and a livable climate - all of which are essential for healthy communities.

Please join us as these activists and advocates, from a variety of community-based and global organizations, discuss their efforts to engage and strengthen disproportionately-impacted communities and catalyze policy change at all levels of government.
