

Stan Abramson

Stan Abramson is counsel in the Washington, DC office of the Arent Fox law firm, where he co-chairs the life sciences group. He assists clients in navigating federal and state regulatory programs for agricultural, industrial and consumer products, including products improved through modern biotechnology and other emerging technologies.

Stan's practice is focused on food safety, environmental law and chemical regulation. He has over 35 years of experience in risk-based programs, including more than five years with the US Environmental Protection Agency, where he served as Associate General Counsel for Pesticides and Toxic Substances and was a principal drafter of the federal government's Coordinated Framework for Regulation of Biotechnology. He represents clients in federal and state enforcement and legislative proceedings, defends challenges to chemical and biological products, develops corporate compliance and product stewardship programs, and conducts environmental audits and due diligence reviews.
