#### **RESEARCH FUNDING**

##### **ONGOING**

2015-2017 *Principal Investigator*, **National Institute of Allergy and Infectious Diseases/Emory University (PTE)**, “A Pilot Legal Intervention to Increase HIV Service Use among Immigrant Latino MSM” (P30AI050409)

This study has two aims: 1) to examine fear of deportation among a population at high risk for HIV, Latino men who have sex with men; and 2) to pilot an innovative structural intervention combining immigration-related legal aid and peer navigation/social support for Latino immigrant sexual minorities to decrease fear of deportation and promote HIV service use. The community partner is La Clínica del Pueblo (LCDP), a Federally Qualified Health Center in Washington, DC that provides health services including HIV testing and treatment to Latino gay men and transgender women. (Total grant: \$214,302)

2012-2017 *Co-Investigator*, **National Institute of Mental Health**, “A Multilevel Intervention to Reduce HIV Risk among Networks of Men in Tanzania” (R01 MH098690; Suzanne Maman, Principal Investigator, UNC) To determine whether men in camps randomized to receive a microfinance and health leadership intervention have a lower incidence of sexually transmitted infections and report perpetrating less physical or sexual violence against female sexual partners as compared to men in camps that were not randomized to receive the microfinance and health intervention. (Total grant: \$2,693,726)

2014-2016 *Principal Investigator*, Mentored Research Project, **Fordham University HIV and Drug Abuse Prevention Research Ethics Training Institute**, NIDA Training Grant 1R25DA031608-01. “Exploring the ethics of a social network intervention to reduce HIV risk among young, Tanzanian men”. This study examines the ethics of involving social networks in HIV prevention interventions. Research is needed on ethical concerns of this approach, including: voluntariness (leaders may influence members’ decisions to participate); beneficence at the network level (network characteristics may change in harmful ways); and individual beneficence (members may experience stigma and mistrust). We will explore these concerns during an ongoing HIV prevention trial with young men’s networks in Tanzania (Total grant: \$19,440)

2013-2016 *Principal Investigator*, **District of Columbia Developmental Center for AIDS Research**, “Exploratory Investigation of the Social and Geographic Context of Sexual Risk Behavior, Identity Development and Service Use among Adolescent Black MSM in DC”. This project gathers formative data regarding the social networks, service utilization and sexual risk behavior among adolescent black men who have sex with men (MSM). Our goal is to use the data gathered to inform the development of an intervention for this population, a high-risk group which has experienced the largest recent increase in HIV infections but for which there has been insufficient attention in intervention research. (Total grant: \$49,712)

### **COMPLETED**

2012-2013 *Principal Investigator*, **American University School of International Service Collaborative Research Awards**, “Identifying HIV Prevention Strategies for Latino Sexual Minority Young Men Living in DC”. To collect formative data from a population of highly vulnerable young Latino men who have sex with men in DC. The community collaborator on this project is *La Clínica del Pueblo*. (Total grant: \$22,392)

2010-2011 *Principal Investigator* (with James Moody, co-PI, Duke University Sociology), **Duke Center for AIDS Research** Small Grant, “Exploring Social Network Influences on Sexual Partnership Concurrency among Young Men in Tanzania”. (Total grant: \$39,976)

2010-2011 *Co-Investigator* (with Suzanne Maman, PI, Health Behavior and Health Education, University of North Carolina at Chapel Hill), **Gillings Innovation Laboratories, Gillings School of Global Public Health**. “Assessing Impact of Microfinance, Leadership Training on Young African Men”. (Total grant: \$80,000)

### **TEACHING EXPERIENCE**

---

- 2011, 2013, 2014, 2016 **Program Planning in Global Health** (Graduate seminar, SIS 633.) Students write a plan for a health promotion intervention in a developing country setting, including a theoretical framework, intervention strategies, and an evaluation plan.
- 2012-2013 **Applied Qualitative Research Methods**. Trained and supervised 6 bilingual MA students to conduct and transcribe 25 in-depth interviews in Spanish with gay and transgender Latino immigrants in DC.
- 2012-2015 **Health in the Developing World** (Advanced undergraduate seminar, SISU-349). Exposes students to the contemporary issues and controversies in global health through an interdisciplinary perspective. Students examine the major determinants of global health problems, and explore solutions to these problems through a social justice and human rights lens.
- 2012 **Micropolitics of Development** (Instructor, graduate seminar, SIS 636). Exposes students to the key social categories (e.g. gender, class, elites, etc.) that affect development at the local, micro or project level. Students learn practical tools to assess micropolitics during the planning and implementation stages of development projects, including qualitative research methods.
- 2006 **Interdisciplinary Perspectives in Global Health** (Co-Instructor, Graduate seminar, UNC-CH, PUBH 510). Seminar for 125 graduate and undergraduate students. Explores contemporary issues, problems and controversies in global health and examines social, political and environmental factors that affect health.
- 2005 **Social and Behavioral Sciences in Public Health** (Teaching Assistant, graduate seminar, UNC-CH, HBHE 600). Introduces students to social and behavioral science theories, research and interventions aimed at promoting health of individuals, groups, communities and populations.
- 2004 **Social Determinants of Health** (Teaching Assistant, graduate seminar, UNC-CH, HBHE 802). Introduces population vs. individual perspectives on health, risk conditions vs. risk factors, concepts of causation, knowledge development as a social, historical process, and macro-level determinants of health.
